Accessories

Check that the following accessories are supplied with the product.

- Remote control
- Batteries (AAA, R03, UM-4) (x2)
- AM antenna
- FM antenna
- YPAO microphone
- CD-ROM (Owner’s Manual)
- Easy Setup Guide
- Safety Brochure

*One of the above is supplied depending on the region of purchase.

Operating range of the remote control

- Point the remote control at the remote control sensor on the unit and remain within the operating range shown below.

Insert the batteries the right way round.

The illustrations of the main unit and remote control used in this manual are of the RX-V575 (U.S.A. model), unless otherwise specified.

- Some features are not available in certain regions.
- Due to product improvements, specifications and appearance are subject to change without notice.
- This manual explains operations using the supplied remote control.
- This manual describes all the “iPod”, “iPhone” and “iPad” as the “iPod”. “iPod” refers to “iPod”, “iPhone” and “iPad”, unless otherwise specified.

⚠️ indicates precautions for use of the unit and its feature limitations.

🔥 indicates supplementary explanations for better use.
What you can do with the unit

Wide variety of supported content
- iPod/iPhone/iPad  ➔ p.47
- USB  ➔ p.51
- Media server (PC/NAS)  ➔ p.54
- Internet radio  ➔ p.57
- AirPlay  ➔ p.59

3D and 4K signals supported

Supports 2- to 5.1-channel (to 7.1-channel*) speaker system. Allows you to enjoy your favorite acoustic spaces in various styles.
- Automatically optimizing the speaker settings to suit your room (YPAO)  ➔ p.31
- Reproducing stereo or multichannel sounds with the sound fields like actual movie theaters and concert halls (CINEMA DSP)  ➔ p.38
- Enjoying compressed music with enhanced sound (Compressed Music Enhancer)  ➔ p.42
- Playing back music in multiple rooms (Zone B)*  ➔ p.61

- RX-V675 only

Change the input source and favorite settings with one touch (SCENE)  ➔ p.36

Sequential operation of a TV, AV receiver, and BD/DVD player (HDMI Control)  ➔ p.100
Features

➤ What you can do with the unit

Full of useful functions!

- Connecting various devices (p.23)
  A number of HDMI jacks and various input/output jacks on the unit allow you to connect video devices (such as BD/DVD players), audio devices (such as CD players), game consoles, camcorders, and other devices.

- Playing back TV audio in surround sound with a single HDMI cable connection (Audio Return Channel: ARC) (p.18)
  When using an ARC-compatible TV, you only need one HDMI cable to enable video output to the TV, audio input from the TV, and the transmission of HDMI Control signals.

- Creating 3-dimensional sound fields (p.38)
  The Virtual Presence Speaker (VPS) function allows you to create a 3-dimensional sound field in your own room (CINEMA DSP 3D).

- Listening to FM/AM radio (p.43)
  The unit is equipped with a built-in FM/AM tuner. You can register up to 40 favorite radio stations as presets.

- Enjoying pure high fidelity sound (p.41)
  When the direct playback mode is enabled, the unit plays back the selected source with the least circuitry, which lets you to enjoy Hi-Fi sound quality.

- Easy operation with a TV screen
  You can operate the iPod or USB storage device, view information, or easily configure the settings using the on-screen menu.

- Low power consumption
  The ECO mode (power saving function) reduces the unit's power consumption and helps to create an eco-friendly home theater system (p.78).

Useful tips

- The combination of video/audio input jacks does not match an external device...
  Use "Audio In" in the "Option" menu to change the combination of video/audio input jacks so that it matches the output jack(s) of your external device (p.25).

- Video and audio are not synchronized...
  Use "Lipsync" in the "Setup" menu to adjust the delay between video and audio output (p.76).

- I want to hear audio from the TV speakers...
  Use "Audio Output" in the "Setup" menu to select the output destination of signals input into the unit (p.74). Your TV speakers may be selected as an output destination.

- I want to use the supplied remote control to operate external devices...
  Register the remote control codes of the external devices (such as a TV and BD/DVD players) (p.85).

- I want to change the on-screen menu language...
  Use "Language" in the "Setup" menu to select a language from English, Japanese, French, German, Spanish, Russian, Italian and Chinese (p.30).

- I want to update the firmware...
  Use "Network Update" (p.88) in the "Setup" menu or "UPDATE" (p.84) in the "ADVANCED SETUP" menu to update the unit's firmware.

- Many other settings are available that let you to customize the unit. For details, see the following pages.
  - SCENE settings (p.36)
  - Sound/video settings and signal information for each source (p.64)
  - Various function settings (p.69)
  - System settings (p.83)

FEATURES

Part names and functions

**1 HDMI OUT jack**  
For connecting to an HDMI-compatible TV and outputting video/audio signals (p.18). When using ARC, TV audio signal can also be input through the HDMI OUT jack.

**2 HDMI 1–4 jacks**  
For connecting to HDMI-compatible playback devices and inputting video/audio signals (p.23).

**3 HDMI 5/MHL jack**  
For connecting to an HDMI- or MHL-compatible playback device and inputting video/audio signals (p.23).

**4 ANTENNA jacks**  
For connecting to FM and AM antennas (p.27).

**5 NETWORK jack**  
For connecting to a network (p.28).

**6 DC OUT jack**  
For supplying power to a Yamaha AV accessory. For details on connections, refer to the instruction manual of the AV accessory.

**7 Power cable**  
For connecting to an AC wall outlet (p.29).

**8 AV 1–6 jacks**  
For connecting to video/audio playback devices and inputting video/audio signals (p.23).

**9 AV OUT jacks**  
For outputting video/audio to a recording device (such as a VCR) (p.29).

**10 AUDIO jacks**  
For connecting to an audio playback device and inputting audio signals (p.26).

**11 SUBWOOFER PRE OUT 1–2 jacks (RX-V575)**  
For connecting to a subwoofer (with built-in amplifier) (p.15).

**12 MONITOR OUT jacks**  
**COMPONENT VIDEO jacks:** For connecting to a TV that supports component video and outputting video signals (p.22).

**VIDEO jack:** For connecting to a TV that supports composite video and outputting video signals (p.22).

**13 SPEAKERS terminals**  
For connecting to speakers (p.15).

**14 VOLTAGE SELECTOR**  
(General model only)  
Selects the switch position according to your local voltage (p.29).

* The area around the video/audio output jacks is marked in white on the actual product to prevent improper connections.

(RX-V575 U.S.A. model)
1 Remote control signal transmitter
Transmits infrared signals.

2 SOURCE key
Turns on/off an external device.

SOURCE/RECEIVER key
Changes the device (the unit or external device) that is operated with the remote control (p.86). You can operate the unit when this key lights up in orange, and an external device when this key lights up in green.

RECEIVER key
Turns on/off (standby) the unit.

3 Input selection keys
Select an input source for playback.
- HDMI 1–4: HDMI 1–4 jacks
- HDMI 5/MHL: HDMI 5/MHL jack
- AV 1–6: AV 1–6 jacks
- V-AUX: VIDEO AUX jack (on the front panel)
- USB: USB jack (on the front panel)
- NET: NETWORK jack (press repeatedly to select a desired network source)
- AUDIO: AUDIO jacks

4 Radio keys
Operate the FM/AM radio (p.43).
- FM: Switches to FM radio.
- AM: Switches to AM radio.
- MEMORY: Registers FM/AM radio stations as presets.
- PRESET: Select a preset station.
- TUNING: Select the radio frequency.

5 INFO key
Selects the information displayed on the front display (p.63).

6 Sound mode keys
Select a sound mode (p.37).

7 SLEEP key
Switches the unit to standby mode automatically after a specified period of time has elapsed (sleep timer). Press repeatedly to set the time (120 min, 90 min, 60 min, 30 min, off).

8 SCENE keys
Select the registered input source and sound program with one touch. Also, turns on the unit when it is in standby mode (p.36).

9 SETUP key
Displays the setup menu (p.68).

10 Menu operation keys
Cursor keys: Select a menu or a parameter.
ENTER: Confirms a selected item.
RETURN: Returns to the previous screen.

11 MODE key
Switches between “Stereo” and “Mono” for FM radio reception (p.43).
Switches the iPod operation modes (p.49).

12 External device operation keys
Let you play back and select menus and perform other operations for external devices (p.86).

13 Numeric keys
Let you enter numerical values, such as radio frequencies.

14 TV operation keys
Let you select TV input and volume, and perform other TV operations (p.85).

15 CODE SET button
Registers remote control codes of external devices on the remote control (p.85).

16 ZONE keys (RX-V575 only)
Enable/disable the audio output to Zone A or Zone B (p.62)

17 ★/★★ keys (RX-V475 only)
Change the external device to be controlled without switching the input source (p.86).

18 OPTION key
Displays the option menu (p.64).

19 VOLUME keys
Adjust the volume.

20 MUTE key
Mutes the audio output.

*To operate external devices with the remote control, register a remote control code for each device before using (p.85).

This completes all the preparations. Enjoy playing movies, music, radio and other content with the unit!
1 Placing speakers

Select the speaker layout for the number of speakers that you are using and place the speakers and subwoofer in your room. This section describes the representative speaker layout examples.

Caution
- (U.S.A. and Canada models only)
  Under its default settings, the unit is configured for 8-ohm speakers. When connecting 6-ohm speakers, set the unit’s speaker impedance to “6 Ω MIN”. In this case, you can also use 4-ohm speakers as the front speakers.
  For details, see “Setting the speaker impedance” (p.14).
- (Except for U.S.A. and Canada models)
  Use speakers with an impedance of at least 6 Ω.

5.1-channel system

4.1-channel system
## Setting the speaker impedance

(U.S.A. and Canada models only)

Under its default settings, the unit is configured for 8-ohm speakers. When connecting 6-ohm speakers, set the speaker impedance to “6 Ω MIN”. In this case, you can also use 4-ohm speakers as the front speakers.

1. Before connecting speakers, connect the power cable to an AC wall outlet.
2. While holding down STRAIGHT on the front panel, press (power).
3. Check that “SP IMP.” is displayed on the front display.
4. Press STRAIGHT to select “6 Ω MIN”.
5. Press (power) to set the unit to standby mode and remove the power cable from the AC wall outlet.

You are now ready to connect the speakers.
2 Connecting speakers

Connect the speakers placed in your room to the unit. The following diagrams provide connections for 5.1- and 7.1-channel systems as examples. For other systems, connect speakers while referring to the connection diagram for the 5.1-channel system.

**Caution**

- Remove the unit's power cable from an AC wall outlet and turn off the subwoofer before connecting the speakers.
- Ensure that the core wires of the speaker cable do not touch one another or come into contact with the unit's metal parts. Doing so may damage the unit or the speakers. If the speaker cables short circuit, "Check SP Wires" will appear on the front display when the unit is turned on.

**Cables required for connection (commercially available)**

- Speaker cables (x the number of speakers)
- Audio pin cable (x1: for connecting a subwoofer)

---

**5.1-channel system**

---

**7.1-channel system**

(RX-V575 only)

- (RX-V575 only) You can connect 2 subwoofers (with built-in amplifier) to the unit. The 2 subwoofers output the same sound.
- When using only one surround back speaker, connect it to the SINGLE jack (L side).
Connecting speaker cables

Speaker cables have two wires. One is for connecting the negative (-) terminal of the unit and the speaker, and the other is for the positive (+) terminal. If the wires are colored to prevent confusion, connect the black wire to the negative and the other wire to the positive terminal.

1. Remove approximately 10 mm (3/8") of insulation from the ends of the speaker cable and twist the bare wires of the cable firmly together.
2. Loosen the speaker terminal.
3. Insert the bare wires of the cable into the gap on the side (upper right or bottom left) of the terminal.
4. Tighten the terminal.

Using a banana plug
(U.S.A., Canada, China, Australia and General models only)

1. Tighten the speaker terminal.
2. Insert a banana plug into the end of the terminal.

Connecting the subwoofer
(with built-in amplifier)

Use an audio pin cable to connect the subwoofer.

Connecting front speakers that support bi-amp connections (RX-V575 only)

When using front speakers that support bi-amp connections, connect them to the FRONT jacks and SURROUND BACK/BI-AMP/ZONE B jacks.

To enable the bi-amp function, set “Power Amp Assign” (p.71) in the “Setup” menu to “BI-AMP” after connecting the power cable to an AC wall outlet.

Caution

- Before making bi-amp connections, remove any brackets or cables that connect a woofer with a tweeter. Refer to the instruction manual of the speakers for details. If you are not making bi-amp connections, make sure that the brackets or cables are connected before connecting the speaker cables.
- Surround back speakers cannot be used during bi-amp connections.

Connecting Zone B speakers (RX-V575 only)

The Zone A/B function allows you to playback an input source in the room where the unit is installed (Zone A) and in another room (Zone B). To connect the Zone B speakers, see “Playing back music in multiple rooms (RX-V575 only)” (p.61).
Input/output jacks and cables

■ Video/audio jacks

❑ HDMI jacks
Transmit digital video and digital sound through a single jack. Use an HDMI cable.

![HDMI cable]

• Use a 19-pin HDMI cable with the HDMI logo. We recommend using a cable less than 5.0 m (16.4 ft) long to prevent signal quality degradation.

• The unit’s HDMI jacks support the HDMI Control, Audio Return Channel (ARC), and 3D and 4K video transmission (through output) features.

• Use high speed HDMI cables to enjoy 3D or 4K videos.

❑ HDMI/MHL jack
Transmit digital video and digital sound. Use an MHL cable.

![MHL cable]

• The HDMI 5/MHL jack of the unit supports both HDMI and MHL connections. Use a cable that matches the jack on your MHL-compatible mobile device. When connecting an HDMI-compatible playback device to the jack, use an HDMI cable. For details on an MHL connection, see “MHL connection” (p.23).

■ Video jacks

❑ COMPONENT VIDEO jacks
Transmit video signals separated into three components: luminance (Y), chrominance blue (Pb), and chrominance red (Pr). Use a component video cable with three plugs.

![Component video cable]

❑ VIDEO jacks
Transmit analog video signals. Use a video pin cable.

![Video pin cable]

■ Audio jacks

❑ OPTICAL jacks
Transmit digital audio signals. Use a digital optical cable. Remove the tip protector (if available) before using the cable.

![Digital optical cable]

❑ COAXIAL jacks
Transmit digital audio signals. Use a digital coaxial cable.

![Digital coaxial cable]

❑ AUDIO jacks
(Stereo L/R jacks)
Transmit analog stereo audio signals. Use a stereo pin cable (RCA cable).

![Stereo pin cable]

(Stereo mini jack)
Transmits analog stereo audio signals. Use a stereo mini-plug cable.

![Stereo mini-plug cable]
3 Connecting a TV

Connect a TV to the unit so that video input to the unit can be output to the TV. You can also enjoy playback of TV audio on the unit. The connection method varies depending on the functions and video input jacks available on your TV. Refer to the instruction manual of the TV and choose a connection method.

Does your TV support Audio Return Channel (ARC)?

Yes ➞ Connection Method 1 (p.18)
No ➞ Connection Method 4 (p.22)

Does your TV support HDMI Control?

Yes ➞ Connection Method 2 (p.20)
No ➞ Connection Method 4 (p.22)

Does your TV have an HDMI input jack?

Yes ➞ Connection Method 3 (p.21)
No ➞ Connection Method 4 (p.22)

### About HDMI Control

HDMI Control allows you to operate external devices via HDMI. If you connect a TV that supports HDMI Control to the unit with an HDMI cable, you can control the unit's power and volume with the TV's remote control. You can also control playback devices (such as an HDMI Control-compatible BD/DVD player) connected to the unit with an HDMI cable. For details, see "HDMI Control" (p.100).

### About Audio Return Channel (ARC)

ARC allows audio signals to travel both ways under HDMI Control. If you connect a TV that supports HDMI Control and ARC to the unit with a single HDMI cable, you can output video/audio to the TV or input TV audio to the unit.

#### Connection Method 1 (HDMI Control/ARC-compatible TV)

Connect the TV to the unit with an HDMI cable.

- The following explanation is based on the assumption that you have not changed the “HDMI” parameters (p.74) in the “Setup” menu.
- Use an HDMI cable that supports ARC.

**When connecting a video device with an analog video output**
- If you will connect any video device to the AV 1–2 (COMPONENT VIDEO) jacks of the unit, you also need to connect the TV to the MONITOR OUT (COMPONENT VIDEO) jacks (p.22).
- If you will connect any video device to the AV 3–6 (VIDEO) jacks or the VIDEO AUX (VIDEO) of the unit, you also need to connect the TV to the MONITOR OUT (VIDEO) jack (p.22).

**When using a set-top box to watch TV**
- Connect the set-top box to the unit in the same way as playback devices (p.23). If you will receive TV broadcasts only from the set-top box, you do not need to make an audio cable connection between the TV and the unit or configure the ARC setting.

- By connecting a TV to the unit with an HDMI cable, you can navigate the iPod, USB storage device and network sources, or configure the settings of the unit with the menu displayed on the TV.
necessary settings
To use HDMI Control and ARC, you need to configure the following settings.
For details on settings and operating your TV, refer to the instruction manual for the TV.

1. After connecting external devices (such as a TV and playback devices) and the power cable to the unit, turn on the unit, TV, and playback devices.

2. Configure the settings of the unit.
   ① Check that ARC is enabled on the TV.
   ② Switch the TV input to display video from the unit.
   ③ Press SETUP.

   ④ Use the cursor keys to select “HDMI” and press ENTER.

   ⑤ Press ENTER again.

   ⑥ Use the cursor keys (△/▽) to select “HDMI Control” and the cursor keys (←/→) to select “On” as shown below.

   ⑦ Press SETUP.

3. Configure the settings for HDMI Control.
   ① Enable HDMI Control on the TV and playback devices (such as HDMI Control-compatible BD/DVD player).
   ② Turn off the TV’s main power and then turn off the unit and playback devices.
   ③ Turn on the unit and playback devices and then turn on the TV’s main power.
   ④ Switch the TV input to display video from the unit.
   ⑤ Check the following.
      - On the unit: The input to which the playback device is connected is selected. If not, select the input source manually.
      - On the TV: The video from the playback device is displayed.
   ⑥ Check that the unit is properly synchronized with the TV by turning off the TV or adjusting the TV volume with the TV remote control.

This completes the necessary settings.
If you select a TV program with the TV remote control, the input source of the unit will be automatically switched to “AV 4” and the TV audio will be played back on the unit.
If you cannot hear the TV’s audio, check that “ARC” (p.75) in the “Setup” menu is set to “On”.

! If HDMI Control does not work properly, try turning off and on (or unplugging and then plugging in again) the devices. It may solve the problem.
  - If the unit is not synchronized to the TV’s power operations, check the priority of the audio output setting on the TV.
  - If the audio is interrupted while using ARC, set “ARC” (p.75) in the “Setup” menu to “Off” and use a digital optical cable to input TV audio to the unit (p.20).

* “AV 4” is set as TV audio input at the factory. If you have connected any external device to the AV 4 jacks, use “TV Audio Input” (p.74) in the “Setup” menu to change the TV audio input assignment. To use the SCENE function (p.36), you also need to change the input assignment for SCENE(TV).
Connection Method 2 (HDMI Control-compatible TV)

Connect the TV to the unit with an HDMI cable and a digital optical cable.

⚠ The following explanation is based on the assumption that you have not changed the “HDMI” parameters (p.74) in the “Setup” menu.

• By connecting a TV to the unit with an HDMI cable, you can navigate the iPod, USB storage device and network sources, or configure the settings of the unit with the menu displayed on the TV.

Necessary settings
To use HDMI Control, you need to configure the following settings.
For details on settings and operating your TV, refer to the instruction manual for the TV.

1 After connecting external devices (such as a TV and playback devices) and power cable of the unit, turn on the unit, TV, and playback devices.

2 Configure the settings of the unit.
   ① Switch the TV input to display video from the unit.
   ② Press SETUP.

   SET UP
   Cursor keys
   ENTER

   ③ Use the cursor keys to select “HDMI” and press ENTER.

   SET UP
   Configuration

   ④ Press ENTER again.
   ⑤ Use the cursor keys (△/▼) to select “HDMI Control” and the cursor keys (◄/►) to select “On” as shown below.

   SET UP
   Configuration

   ⑥ Press SETUP.
3 Configure the settings for HDMI Control.

1. Enable HDMI Control on the TV and playback devices (such as a HDMI Control-compatible BD/DVD player).
2. Turn off the TV’s main power and then turn off the unit and playback devices.
3. Turn on the unit and playback devices and then turn on the TV.
4. Switch the TV input to display video from the unit.
5. Check the following.
   - **On the unit**: The input to which the playback device is connected is selected. If not, select the input source manually.
   - **On the TV**: The video from the playback device is displayed.
6. Check that the unit is properly synchronized with the TV by turning off the TV or adjusting the TV volume with the TV remote control.

This completes the necessary settings.

If you select a TV program with the TV remote control, the input source of the unit will be automatically switched to “AV 4” and the TV audio will be played back on the unit.

⚠️ If HDMI Control does not work properly, try turning off and on (or unplugging and then plugging in again) the devices. It may solve the problem.

⚠️ If the unit is not synchronized to the TV’s power operations, check the priority of the audio output setting on the TV.

⚠️ “AV 4” is set as TV audio input at the factory. If you have connected any external device to the AV 4 jacks or if you want to use another input jack (other than OPTICAL) for connecting the TV, use “TV Audio Input” (p.74) in the “Setup” menu to change the TV audio input assignment. To use the SCENE function (p.36), you also need to change the input assignment for SCENE(TV).

---

### Connection Method 3 (TV with HDMI input jacks)

Connect the TV to the unit with an HDMI cable and a digital optical cable.

Connect the TV to the unit with an HDMI cable and a digital optical cable. If you switch the input source of the unit to “AV 4” using the AV 4 or SCENE(TV) keys, the TV audio will be played back on the unit.

- By connecting a TV to the unit with an HDMI cable, you can navigate the iPod, USB storage device and network sources, or configure the settings of the unit with the menu displayed on the TV.
- If you have connected any external device to the AV 4 jacks or if you want to use another input jack (other than OPTICAL) for connecting the TV, connect the TV to one of the AV 1–6 and AUDIO jacks. To use the SCENE function (p.36), you also need to change the input assignment for SCENE(TV).
Connection Method 4 (TV without HDMI input jacks)

When connecting any video device to the AV 1–2 (COMPONENT VIDEO) jacks of the unit, connect the TV to the MONITOR OUT (COMPONENT VIDEO) jacks.

When connecting any video device to the AV 3–6 (VIDEO) jacks or the VIDEO AUX (VIDEO) jack of the unit, connect the TV to the MONITOR OUT (VIDEO) jack.

If you select “AV 4” as the input source by pressing AV 4 or SCENE(TV), the TV audio will be played back on the unit.

- If you connect your TV to the unit with a cable other than HDMI, video input to the unit via HDMI cannot be output to the TV.
- Operations with TV screen are available only when your TV is connected to the unit via HDMI.
- If you have connected any external device to the AV 4 jacks or if you want to use another input jack (other than OPTICAL) for connecting the TV, connect the TV to one of the AV 1–6 and AUDIO jacks. To use the SCENE function (p.36), you also need to change the input assignment for SCENE(TV).

COMPONENT VIDEO connection (with a component video cable)
4 Connecting playback devices

The unit is equipped with a variety of input jacks including HDMI input jacks to allow you to connect different types of playback devices. For information on how to connect an iPod or a USB storage device, see the following pages.

- Connecting an iPod (p.47)
- Connecting a USB storage device (p.51)

Connecting video devices (such as BD/DVD players)

Connect video devices such as BD/DVD players, set-top boxes (STBs) and game consoles to the unit. Depending on the video/audio output jacks available on your video device, choose one of the following connections. We recommend using an HDMI connection if the video device has an HDMI output jack.

- If the combination of video/audio input jacks available on the unit does not match your video device, change its combination according to the output jacks of your device (p.25).

HDMI connection

Connect a video device to the unit with an HDMI cable.

If you select the input source by pressing HDMI 1–5, the video/audio played back on the video device will be output from the unit.

- To watch videos input to the HDMI 1–5 jacks, you need to connect your TV to the HDMI OUT jack of the unit (p.18 to 21).

MHL connection

Connect an MHL-compatible mobile device (such as smartphones) to the unit with an MHL cable. You can enjoy full HD videos and multichannel audio sources stored on the mobile device. The HDMI 5 jack of the unit enables you to input videos and audio directly from the mobile device to the unit.

If you select the input source by pressing HDMI 5, the video/audio played back on the mobile device will be output from the unit.

- To watch videos input to the HDMI 5/MHL jack, you need to connect your TV to the HDMI OUT jack of the unit (p.18 to 21).
- You need to prepare an MHL cable that match the jack on your mobile device.
- You can operate the mobile device using the menu operation keys, external device operation keys and numeric keys on the remote control. However, some features may not be compatible, depending on the mobile device or its application. In this case, operate the mobile device itself.
- If “Standby Through” (p.74) in the “Setup” menu is set to “On”, you can output mobile device videos/audio to the TV or operate the mobile device using the remote control of the unit even when the unit is in standby mode.
- The unit supplies power to the mobile device in the following conditions.
  - The unit is turned on.
  - The unit is in standby mode while “Standby Through” (p.74) in the “Setup” menu is set to “On”.
### Component video connection

Connect a video device to the unit with a component video cable and an audio cable (digital optical or digital coaxial). Choose a set of input jacks (on the unit) depending on the audio output jacks available on your video device.

<table>
<thead>
<tr>
<th>Output jacks on video device</th>
<th>Input jacks on the unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video</td>
<td>Audio</td>
</tr>
<tr>
<td>Component video</td>
<td>Digital optical</td>
</tr>
<tr>
<td></td>
<td>AV 1 (COMPONENT VIDEO + OPTICAL)</td>
</tr>
<tr>
<td></td>
<td>Digital coaxial</td>
</tr>
<tr>
<td></td>
<td>AV 2 (COMPONENT VIDEO + COAXIAL)</td>
</tr>
</tbody>
</table>

If you select the input source by pressing AV 1–2, the video/audio played back on the video device will be output from the unit.

- To watch videos input to the AV 1–2 (COMPONENT VIDEO) jacks, you need to connect your TV to the MONITOR OUT (COMPONENT VIDEO) jacks of the unit (p.22).

### Composite video connection

Connect a video device to the unit with a video pin cable and an audio cable (digital coaxial, digital optical, or stereo pin cable). Choose a set of input jacks (on the unit) depending on the audio output jacks available on your video device.

<table>
<thead>
<tr>
<th>Output jacks on video device</th>
<th>Input jacks on the unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video</td>
<td>Audio</td>
</tr>
<tr>
<td>Composite video</td>
<td>Digital coaxial</td>
</tr>
<tr>
<td></td>
<td>AV 3 (VIDEO + COAXIAL)</td>
</tr>
<tr>
<td></td>
<td>Digital optical</td>
</tr>
<tr>
<td></td>
<td>AV 4 (VIDEO + OPTICAL)</td>
</tr>
<tr>
<td></td>
<td>Analog stereo</td>
</tr>
<tr>
<td></td>
<td>AV 5–6 (VIDEO + AUDIO)</td>
</tr>
</tbody>
</table>

If you select the input source by pressing AV 3–6, the video/audio played back on the video device will be output from the unit.

- To watch videos input to the AV 3–6 (VIDEO) jacks, you need to connect your TV to the MONITOR OUT (VIDEO) jack of the unit (p.22).
Changing the combination of video/audio input jacks

If the combination of video/audio input jacks available on the unit does not match your video device, change its combination according to the output jacks of your device. You can connect a video device that has the following video/audio output jacks.

<table>
<thead>
<tr>
<th>Output jacks on video device</th>
<th>Input jacks on the unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>HDMI</td>
<td></td>
</tr>
<tr>
<td>Digital optical</td>
<td>HDMI 1–5</td>
</tr>
<tr>
<td>Digital coaxial</td>
<td>HDMI 1–5</td>
</tr>
<tr>
<td>Analog stereo</td>
<td>HDMI 1–5</td>
</tr>
<tr>
<td>Component video</td>
<td></td>
</tr>
<tr>
<td>Analog stereo</td>
<td>AV 1–2 (COMPONENT VIDEO)</td>
</tr>
<tr>
<td></td>
<td>AV 5–6 (AUDIO)</td>
</tr>
</tbody>
</table>

**Necessary setting**

For example, if you have connected a video device to AV 2 (COMPONENT VIDEO) and AV 5 (AUDIO) jacks of the unit, change the combination setting as follows.

1. After connecting external devices (such as a TV and playback devices) and power cable of the unit, turn on the unit.
2. Press AV 2 to select “AV 2” (video input jack to be used) as the input source.
3. Press OPTION.
4. Use the cursor keys (△/▽) to select “Audio In” and press ENTER.
5. Use the cursor keys (</> to select “AV 5” (audio input jack to be used).
6. Press OPTION.

This completes the necessary settings. If you select “AV 2” as the input source by pressing AV 2, the video/audio played back on the video device will be output from the unit.
Connecting audio devices (such as CD players)

Connect audio devices such as CD players and MD players to the unit. Depending on the audio output jacks available on your audio device, choose one of the following connections.

<table>
<thead>
<tr>
<th>Audio output jacks on audio device</th>
<th>Audio output jacks on the unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Digital optical</td>
<td>AV 1 (OPTICAL) AV 4 (OPTICAL)</td>
</tr>
<tr>
<td>Digital coaxial</td>
<td>AV 2–3 (COAXIAL)</td>
</tr>
<tr>
<td>Analog stereo</td>
<td>AV 5–6 (AUDIO) AUDIO</td>
</tr>
</tbody>
</table>

The unit (rear)

If you select the input source by pressing AV 1–6 or AUDIO, the audio played back on the audio device will be output from the unit.

Connecting to the jacks on the front panel

Use the VIDEO AUX jacks on the front panel to temporarily connect devices such as camcorders and portable audio players to the unit. Before making a connection, stop playback on the device and turn down the volume on the unit.

If you select “V-AUX” as the input source by pressing V-AUX, the video/audio played back on the device will be output from the unit.

- To watch videos input to the VIDEO AUX (VIDEO) jack, you need to connect your TV to the MONITOR OUT (VIDEO) jack of the unit (p.22).
- You need to prepare the video/audio cables that match the output jacks on your device.
- For details on how to connect an iPod or a USB storage device, see “Connecting an iPod” (p.47) or “Connecting a USB storage device” (p.51).
- When “USB” is selected as the input source, video signals input to the VIDEO AUX (VIDEO) jack are output from the MONITOR OUT (VIDEO) jack.
5 Connecting the FM/AM antennas

Connect the supplied FM/AM antennas to the unit.
Fix the end of the FM antenna to a wall, and place the AM antenna on a flat surface.

Assembling and connecting the AM antenna

- Unwind only the length of cable needed from the AM antenna unit.
- The wires of the AM antenna have no polarity.
6 Connecting to a network

Connect the unit to your router with a commercially-available STP network cable (CAT-5 or higher straight cable).

You can enjoy Internet radio or music files stored on media servers, such as PCs and Network Attached Storage (NAS), on the unit.

- If you are using a router that supports DHCP, you do not need to configure any network settings for the unit, as the network parameters (such as the IP address) will be assigned automatically to it. You only need to configure the network settings if your router does not support DHCP or if you want to configure the network parameters manually (p.80).
- You can check whether the network parameters (such as IP address) are properly assigned to the unit in “Information” (p.80) in the “Setup” menu.

- Some security software installed on your PC or the firewall settings of network devices (such as a router) may block the access of the unit to the network devices or the Internet. In these cases, configure the security software or firewall settings appropriately.
- Each server must be connected to the same subnet as the unit.
- To use the service via the Internet, broadband connection is strongly recommended.
7 Connecting recording devices

You can connect video/audio recording devices to the AV OUT jacks. These jacks output analog video/audio signals selected as the input.

- To copy video/audio from a video device, connect the video device to the AV 5–6 jacks or VIDEO AUX (VIDEO/AUDIO) jacks of the unit.
- To copy audio from an audio device, connect the audio device to the AV 5–6 jacks, AUDIO jacks, or VIDEO AUX (AUDIO) jacks of the unit.
- Be sure to use the AV OUT jacks only for connecting recording devices.

8 Connecting the power cable

**Before connecting the power cable (General model only)**

Set the switch position of VOLTAGE SELECTOR according to your local voltage. Voltages are AC 110–120/220–240 V, 50/60 Hz.

- Make sure you set VOLTAGE SELECTOR of the unit BEFORE plugging the power cable into an AC wall outlet. Improper setting of VOLTAGE SELECTOR may cause damage to the unit and create a potential fire hazard.

After all the connections are complete, plug in the power cable.
Selecting an on-screen menu language

Select the desired on-screen menu language from English (default), Japanese, French, German, Spanish, Russian, Italian and Chinese.

1. Press RECEIVER  to turn on the unit.
2. Turn on the TV and switch the TV input to display video from the unit (HDMI OUT jack).
   • Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.
3. Press SETUP.
4. Use the cursor keys to select “Language” and press ENTER.
5. Use the cursor keys to select the desired language.

To exit from the menu, press SETUP.

*The information on the front display is provided in English only.
The Yamaha Parametric room Acoustic Optimizer (YPAO) function detects speaker connections, measures the distances from them to your listening position(s), and then automatically optimizes the speaker settings, such as volume balance and acoustic parameters, to suit your room.

Please note the following when using YPAO.

- Use YPAO after connecting a TV and speakers to the unit.
- During the measuring process, test tones are output at high volume. Ensure that the test tones do not frighten small children. Also, refrain from using this function at night when it may be a nuisance to others.
- During the measuring process, you cannot adjust the volume.
- During the measuring process, keep the room as quiet as possible.
- Do not connect headphones.

1. Press RECEIVER \(\bigcirc\) to turn on the unit.

2. Turn on the TV and switch the TV input to display video from the unit (HDMI OUT jack).

   - Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.

3. Turn on the subwoofer and set the volume to half. If the crossover frequency is adjustable, set it to maximum.

   - (RX-V575 only)
   If you are using bi-amp connection or Zone B speakers, set “Power Amp Assign” (p.71) in the “Setup” menu to the appropriate setting before starting YPAO.

4. Place the YPAO microphone at your listening position (same height as your ears) and connect it to the YPAO MIC jack on the front panel.
To cancel the operation, disconnect the YPAO microphone, or use the cursor keys to select “Exit” and press ENTER, before starting the measurement.

Do not stand between the speakers and the YPAO microphone during the measurement process (about 3 minutes).

Move to the corner of the room or leave the room.

To start the measurement, use the cursor keys to select “Start” and press SETUP. The measurement will start in 10 seconds. Press ENTER to start the measurement immediately.

To stop the measurement temporarily, press RETURN and follow the procedure in “Error messages” (p.33).

If cursor keys do not work, the remote control may be set to the external device operation mode. In this case, press SOURCE/RECEIVER to set the remote control to the unit operation mode (the key lights up in orange) and then use the cursor keys.

The following screen appears on the TV when the measurement finishes:

1. The number of speakers (front side/rear side/subwoofer)
2. Speaker distance (nearest/farthest)
3. Adjustment range of speaker output level
4. Warning message (if available)

If any error message (such as E-1) or warning message (such as W-1) appears, see “Error messages” (p.33) or “Warning messages” (p.34).

A speaker with a problem is indicated by blinking of the speaker indicators in the front display.

If multiple warnings are given (when operating with the front display), use the cursor keys (>/<) to check the other warning messages.

To save the measurement results, use the cursor keys (</> to select “SAVE” and press ENTER. The adjusted speaker settings are applied.

To finish the measurement without saving the result, select “CANCEL”.

Disconnect the YPAO microphone from the unit. This completes optimization of the speaker settings.

Caution

The YPAO microphone is sensitive to heat, so should not be placed anywhere where it could be exposed to direct sunlight or high temperatures (such as on top of AV equipment).
Error messages

If any error message is displayed during the measurement, resolve the problem and perform YPAO again.

<table>
<thead>
<tr>
<th>Error message</th>
<th>Cause</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>E-1:No Front SP</td>
<td>Front speakers are not detected.</td>
<td>Exit YPAO, turn off the unit, and then check the speaker connections.</td>
</tr>
<tr>
<td>E-2:No Sur. SP</td>
<td>One of the surround speakers cannot be detected.</td>
<td>When using only one surround back speaker, you need to connect it to the SINGLE jack (L side). Exit YPAO, turn off the unit, and then reconnect the speaker.</td>
</tr>
<tr>
<td>E-4:SBR → SBL</td>
<td>A surround back speaker is connected to the R side only.</td>
<td>Keep the room quiet and retry YPAO. If you select “PROCEED”, YPAO takes the measurement again and ignores any noise detected.</td>
</tr>
<tr>
<td>E-5:Noisy NOISY</td>
<td>The noise is too loud.</td>
<td>Surround speakers need to be connected in order to use surround back speakers. Exit YPAO, turn off the unit, and then reconnect the speakers.</td>

<tr>
<td>E-6:Check Sur.</td>
<td>Surround back speakers are connected, but no surround speakers are connected.</td>
<td>Connect the YPAO microphone to the YPAO MIC jack firmly and retry YPAO.</td>
</tr>
<tr>
<td>E-7:No MIC NO MIC</td>
<td>The YPAO microphone has been removed.</td>
<td>Connect the YPAO microphone to the YPAO MIC jack firmly and retry YPAO.</td>
</tr>
<tr>
<td>E-8:No Signal</td>
<td>The YPAO microphone cannot detect test tones.</td>
<td>Connect the YPAO microphone to the YPAO MIC jack firmly and retry YPAO.</td>
</tr>
<tr>
<td>E-9:User Cancel</td>
<td>The measurement has been canceled.</td>
<td>Retry or exit YPAO as necessary.</td>
</tr>
<tr>
<td>E-10:Internal Err.</td>
<td>An internal error has occurred.</td>
<td>Exit YPAO, and turn off and on the unit. If this error occurs repeatedly, contact the nearest authorized Yamaha dealer or service center.</td>
</tr>
</tbody>
</table>

- Texts in parentheses denote indicators on the front display.

Procedure to handle errors

1. Check the content of error message and press ENTER.
2. Use the cursor keys (< or >) to select the desired operation.
   - To exit the YPAO measurement: ① Select “EXIT” and press ENTER. ② Use the cursor keys (△ or ▽) to select “Exit” and press ENTER. ③ Disconnect the YPAO microphone from the unit.
   - To retry the YPAO measurement from beginning: Select “RETRY” and press ENTER.
   - To proceed with the current YPAO measurement (for E-5 and E-9 only): Select “PROCEED” and press ENTER.
Warning messages

If a warning message is displayed after the measurement, you can still save the measurement results by following on-screen instructions. However, we recommend you perform YPAO again in order to use the unit with the optimal speaker settings.

### Procedure to handle warnings

1. Check the content of warning message and press ENTER.

2. Use the cursor keys (◄/►) to select the desired operation.
   - To save the measurement results: Select “SAVE” and press ENTER.
   - To discard the measurement result: Select “CANCEL” and press ENTER.

3. Disconnect the YPAO microphone from the unit.

<table>

* Texts in parentheses denote indicators on the front display.
Basic playback procedure

1. Turn on the external devices (such as a TV or BD/DVD player) connected to the unit.
2. Use the input selection keys to select an input source.
3. Start playback on the external device or select a radio station.
   - Refer to the instruction manual for the external device.
   - For details on the following operations, see the corresponding pages.
     - Listening to FM/AM radio (p.43)
     - Playing back iPod music (p.47)
     - Playing back music stored on a USB storage device (p.51)
     - Playing back music stored on media servers (PCs/NAS) (p.54)
     - Listening to Internet radio (p.57)
     - Playing back iTunes/iPod music via a network (AirPlay) (p.59)
4. Press VOLUME to adjust the volume.
   - To mute the audio output, press MUTE. Press MUTE again to unmute.
   - To adjust the treble/bass settings, use the “Option” menu or TONE CONTROL on the front panel (p.65).
Selecting the input source and favorite settings with one touch (SCENE)

The SCENE function allows you to select the assigned input source, sound program, Compressed Music Enhancer on/off, and target zones (RX-V575 only) with just one touch.

1 Press SCENE.
   The input source and settings registered to the corresponding scene are selected. The unit turns on automatically when it is in standby mode.

By default, the following settings are registered for each scene.

* RX-V575: 7ch Stereo, RX-V475: 5ch Stereo

* RX-V575: 7ch Stereo, RX-V475: 5ch Stereo

- The SCENE link playback function allows you to automatically turn on the TV or start playback of an external device connected to the unit via HDMI, in conjunction with a scene selection. To enable SCENE link playback, set “SCENE” (p.75) in the “Setup” menu to “On”.
- If you have not registered the remote control code of the playback device yet, see “Registering the remote control codes for playback devices” (p.86) to register it.

Configuring scene assignments

1 Perform the following operations to prepare the settings you want to assign to a scene.
   - Select an input source (p.35)
   - Select a sound program (p.37)
   - Enable/disable Compressed Music Enhancer (p.42)
   - (RX-V575 only) Enable/disable the audio output to Zone A/B (p.62)

2 Hold down the desired SCENE key until “SET Complete” appears on the front display.

3 If you want to control the corresponding playback device after selecting the scene, hold down the corresponding SCENE key and input selection key together for more than 3 seconds.

Once the setting is completed successfully, SOURCE/RECEIVER blinks twice.

- Configuring scene assignments
- Selecting the input source and favorite settings with one touch (SCENE)
Selecting the sound mode

The unit is equipped with a variety of sound programs and surround decoders that allow you to enjoy playback sources with your favorite sound mode (such as sound field effect or stereo playback).

- **Selecting a sound program suitable for movies**
  - Press MOVIE repeatedly.
  This mode lets you enjoy sound field effects optimized for viewing video sources, such as movies, TV programs, and games (p.38).

- **Selecting a sound program suitable for music or stereo playback**
  - Press MUSIC repeatedly.
  This mode lets you enjoy sound field effects optimized for listening to music sources or stereo playback (p.39).

- **Selecting a surround decoder**
  - Press SUR.DECODE repeatedly.
  This mode lets you enjoy unprocessed multichannel playback from 2-channel sources (p.41).

- **Switching to the straight decode mode**
  - Press STRAIGHT.
  This mode lets you enjoy unprocessed sounds in original channels (p.40).

- **Switching to the direct playback mode**
  - Press DIRECT.
  This mode lets you enjoy pure high fidelity sound by reducing the electrical noise from other circuitry (p.41).

- **Enabling Compressed Music Enhancer**
  - Press ENHANCER.
  This mode lets you enjoy compressed music with additional depth and breadth (p.42).

- You can also switch the sound programs and surround decoder by pressing PROGRAM on the front panel.
- The sound mode can be applied separately to each input source.
- When you play back audio signals with a sampling rate of higher than 96 kHz or playing back DTS Express, the straight decode mode (p.40) is automatically selected.
- You can check which speakers are currently outputting sound by looking at the speaker indicators on the unit’s front panel (p.8).
## Enjoying sound field effects (CINEMA DSP)

The unit is equipped with a variety of sound programs that utilize Yamaha's original DSP technology (CINEMA DSP). It allows you to easily create sound fields like actual movie theaters or concert halls in your room.

### When you play back DTS-HD sources, the DTS decoder is automatically selected.

- You can adjust the sound field effect level in “DSP Level” (p.65) in the "Option" menu.

### Sound programs suitable for movies (MOVIE)

The following sound programs are optimized for viewing video sources, such as movies, TV programs, and games.

<table>
<thead>
<tr>
<th>Sound program category</th>
<th>Sound program</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>This program creates a sound field that emphasizes the surround feeling without disturbing the original acoustic positioning of multichannel audio, such as Dolby Digital and DTS. Its design is based on the concept of the ideal movie theater, in which the audience is surrounded by beautiful reverberations from the left, right, and rear.</td>
<td></td>
</tr>
<tr>
<td>Spectacle</td>
<td>This program delivers the scale and grandeur of spectacular movie productions. It delivers an expansive sound space to match the cinemascope wide-screen, and boasts a broad dynamic range, providing everything from small delicate sounds to powerful loud booms.</td>
<td></td>
</tr>
<tr>
<td>Sci-Fi</td>
<td>This program clearly reproduces the finely elaborated sound design of the latest Sci-Fi and SFX movies. You can enjoy a variety of cinematographically created virtual spaces reproduced with clear separation between dialogue, sound effects, and background music.</td>
<td></td>
</tr>
<tr>
<td>Adventure</td>
<td>This program is ideal for reproducing the sound design of action and adventure movies precisely. The sound field restrains reverberations, but puts emphasis on reproducing a sensation of expansiveness on both sides, powerful space expanded widely to the left and right. The restrained depth creates a clear and powerful space, while also maintaining the articulation of the sounds and the separation of the channels.</td>
<td></td>
</tr>
<tr>
<td>Drama</td>
<td>This program features stable reverberations that match a wide range of movie genres, from serious dramas to musicals and comedies. The reverberations are modest, but suitably stereophonic. The sound effects and background music are reproduced with a gentle echo that does not impinge on the articulation of the dialogue. You'll never get tired listening for long periods.</td>
<td></td>
</tr>
<tr>
<td>Mono Movie</td>
<td>This program reproduces monaural video sources, such as classic movies, in an atmosphere of a good old movie theater. The program creates a pleasant space with depth, by adding breadth and the appropriate reverberation to the original audio.</td>
<td></td>
</tr>
<tr>
<td>Sports</td>
<td>This program allows listeners to enjoy the rich vividness of sport broadcasts and light entertainment programs. In sports broadcasts, the commentators’ voices are positioned clearly at the center, while the atmosphere inside the stadium is realistically conveyed by the peripheral delivery of the sounds of the fans in a suitable space.</td>
<td></td>
</tr>
<tr>
<td>Action Game</td>
<td>This program is suitable for action games, such as car racing and fighting games. The reality of, and emphasis on, various effects makes the player feel like they are right in the middle of the action, allowing for greater concentration. Use this program in combination with Compressed Music Enhancer for a more dynamic and strong sound field.</td>
<td></td>
</tr>
<tr>
<td>Roleplaying Game</td>
<td>This program is suitable for role-playing and adventure games. This program adds depth to the sound field for natural and realistic reproduction of background music, special effects, and dialogue from a wide variety of scenes. Use this program in combination with Compressed Music Enhancer for a clearer and more spatial sound field.</td>
<td></td>
</tr>
</tbody>
</table>
### Sound programs suitable for music/stereo playback (MUSIC)

The following sound programs are optimized for listening to music sources. You can also select stereo playback.

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hall in Munich</td>
<td>This program simulates a Munich concert hall with approximately 2,500 seats that uses stylish wood for the interior finishing. Fine, beautiful reverberations spread richly, creating a calming atmosphere. The listener's virtual seat is at the center left of the arena.</td>
</tr>
<tr>
<td>Hall in Vienna</td>
<td>This program simulates a 1700-seat, middle-sized concert hall with a shoebox shape that is traditional in Vienna. Pillars and ornate carvings create extremely complex reverberations from all around the audience, producing a very full, rich sound.</td>
</tr>
<tr>
<td>Chamber</td>
<td>This program creates a relatively wide space with a high ceiling, like an audience hall in a palace. It offers pleasant reverberations that are suitable for courtly music and chamber music.</td>
</tr>
<tr>
<td>Cellar Club</td>
<td>This program simulates an intimate concert venue with a low ceiling and homely atmosphere. A realistic, live sound field delivers powerful sounds that make you feel as if you are sitting in the front row in front of a small stage.</td>
</tr>
<tr>
<td>The Roxy Theatre</td>
<td>This program creates the sound field of a 460-seat rock music concert venue in Los Angeles. The listener's virtual seat is at the center left of the hall.</td>
</tr>
<tr>
<td>The Bottom Line</td>
<td>This program creates the sound field at stage front in The Bottom Line, a famous New York jazz club once. The floor can seat 300 people to the left and right in a sound field offering real and vibrant sound.</td>
</tr>
<tr>
<td>Music Video</td>
<td>This program allows you to enjoy videos of pop, rock, and jazz concerts, as if you were there yourself. Immerse yourself in the hot concert atmosphere thanks to the vividness of the singers and solos on stage, a presence sound field that emphasizes the beat of rhythm instruments, and a surround sound field that reproduces the space of a big live hall.</td>
</tr>
<tr>
<td>2ch Stereo</td>
<td>Use this program to mix down multichannel sources to 2 channels. When multichannel signals are input, they are down mixed to 2 channels and output from the front speakers (this program does not utilize CINEMA DSP).</td>
</tr>
<tr>
<td>7ch Stereo</td>
<td>(RX-V575: 7ch Stereo, RX-V475: 5ch Stereo)</td>
</tr>
<tr>
<td>5ch Stereo</td>
<td>(RX-V575: 7ch Stereo, RX-V475: 5ch Stereo) Use this program to output sound from all speakers. When you play back multichannel sources, the unit mixes down the source to 2 channels, and then outputs the sound from all speakers. This program creates a larger sound field and is ideal for background music at parties.</td>
</tr>
</tbody>
</table>
Enjoying stereoscopic sound fields (CINEMA DSP 3D)

CINEMA DSP 3D creates a natural stereoscopic sound field in your room.
CINEMA DSP 3D functions when both of the following conditions are met.

- One of the sound programs (except 2ch Stereo and 7ch/5ch Stereo) is selected (p.38).
- “CINEMA DSP 3D Mode” (p.75) in the “Setup” menu is set to “On”.

Enjoying sound field effects without surround speakers (Virtual CINEMA DSP)

If you select one of the sound programs (except 2ch Stereo and 7ch/5ch Stereo) when no surround speakers are connected, the unit automatically creates the surround sound field using the front-side speakers.

Enjoying unprocessed playback

You can play back input sources without any sound field effect processing.

Playing back in original channels (straight decode)

When the straight decode mode is enabled, the unit produces stereo sound from the front speakers for 2-channel sources such as CDs, and produces unprocessed multichannel sounds for multichannel sources.

1. Press STRAIGHT.
   Each time you press the key, the straight decode mode is enabled or disabled.

   ![STRAIGHT button](image)

   “CINEMA DSP 3D” lights up

   ![CINEMA DSP 3D button](image)

   Hall in Vienna

   ![MUSIC source](image)

   STRAIGHT

   ![STRAIGHT button](image)

(REX-V575 only)

To enable 6.1/7.1-channel playback from 5.1-channel sources when surround back speakers are used, set “Extended Surround” (p.65) in the “Option” menu to a setting other than “Off”.

![Extended Surround setting](image)
Playing back 2-channel sources in multichannel (surround decoder)

The surround decoder enables unprocessed multichannel playback from 2-channel sources. When a multichannel source is input, it works the same way as the straight decode mode.

For details on each decoder see “Glossary” (p.97).

1 Press SUR.DECODE to select a surround decoder.

Each time you press the key, the surround decoder changes.

! You cannot select the Dolby Pro Logic IIx decoders when headphones are connected or when “Surround Back” in the “Setup” menu is set to “None”.

You can adjust the surround decoder parameters in “DSP Parameter” (p.75) in the “Setup” menu.

Enjoying pure high fidelity sound (direct playback)

When the direct playback mode is enabled, the unit plays back the selected source with the least circuitry in order to reduce the electrical noise from other circuitry (such as the front display). It allows you to enjoy Hi-Fi sound quality.

1 Press DIRECT.

Each time you press the key, the direct playback mode is enabled or disabled.

! When the direct playback mode is enabled, the following functions are not available.

– Selecting sound programs
– Adjusting the tone control
– Operating the on-screen and “Option” menus
– Viewing information on the front display (when not in operation)

<table>

* RX-V575 only
Enjoying compressed music with enhanced sound (Compressed Music Enhancer)

Compressed Music Enhancer adds depth and breadth to the sound, allowing you to enjoy a dynamic sound close to the original sound before it was compressed. This function can be used along with any other sound modes.

1 Press ENHANCER.
   Each time you press the key, Compressed Music Enhancer is enabled or disabled.
   “ENHANCER” lights up

   ![Enhancer On]

   ![Compressed Music Enhancer does not work on the following audio sources.
   – Signals whose sampling rate is over 48 kHz
   – High-definition streaming audio

   ![You can also use “Enhancer” (p.66) in the “Option” menu to enable/disable Compressed Music Enhancer.]

Enjoying surround sound with headphones (SILENT CINEMA)

You can enjoy surround or sound field effects, like a multichannel speaker system, with stereo headphones by connecting the headphones to the PHONES jack and selecting a sound program or a surround decoder.
Listening to FM/AM radio

You can tune into a radio station by specifying its frequency or selecting from registered radio stations.

- The radio frequencies differ depending on the country or region where the unit is being used. The explanation of this section uses a display with frequencies used in U.K. and Europe models.
- If you cannot obtain good reception on the radio, adjust the direction of the FM/AM antennas.

Setting the frequency steps

(Asia and General models only)

At the factory, the frequency step setting is set to 50 kHz for FM and 9 kHz for AM. Depending on your country or region, set the frequency steps to 100 kHz for FM and 10 kHz for AM.

1. Set the unit to standby mode.
2. When holding down STRAIGHT on the front panel, press (power).
3. Press PROGRAM repeatedly to select “TU”.
4. Press STRAIGHT to select “FM100/AM10”.
5. Press (power) to set the unit to standby mode and turn it on again.

Selecting a frequency for reception

1. Press FM or AM to select a band.
2. Use the following keys to set a frequency.
   - TUNING: Increase/decrease the frequency. Hold down the key for about a second to search stations automatically.
   - Numeric keys: Enter a frequency directly. For example, to select 98.50 MHz, press “9”, “8”, “5” and “0” (or ENT).
   - “TUNED” lights up when a signal is received from a radio station.
   - “STEREO” also lights up when a stereo signal is received.
   - “Wrong Station!” appears when you enter a frequency that is out of reception range.
   - You can switch between “Stereo” (stereo) and “Mono” (monaural) for FM radio reception by pressing MODE. When the signal reception for an FM radio station is unstable, switching to monaural may improve it.
   - You can watch videos input from external devices while listening to radio by selecting the video input jack in “Video Out” (p.67) in the “Option” menu.
Registering favorite radio stations (presets)

You can register up to 40 radio stations as presets. Once you have registered stations, you can easily tune into them by selecting their preset numbers.

■ Registering radio stations automatically (Auto Preset)

Automatically register FM radio stations with strong signals (up to 40 stations).

- To register AM radio stations, follow “Registering a radio station manually”.
- (U.K. and Europe models only) Only Radio Data System broadcasting stations are stored automatically by the Auto Preset function.

1 Press FM or AM to select “TUNER” as the input source.

2 Press OPTION.

3 Use the cursor keys to select “Auto Preset”.

4 To start the Auto Preset process, press ENTER.

The registration will start in 5 seconds. Press ENTER again to start the registration immediately.

- To specify the preset number from which to start the registration, press PRESET or cursor keys (q, w) to select a preset number within 5 seconds after step 4 (while “READY” is displayed) and then press ENTER (or just wait for 5 seconds).
- To cancel the Auto Preset process, press RETURN.

When the Auto Preset process finishes, “FINISH” appears and the “Option” menu closes automatically.

■ Registering a radio station manually

Select a radio station manually and register it to a preset number.

1 Follow “Selecting a frequency for reception” (p.43) to tune into the desired radio station.

2 Hold down MEMORY for more than 2 seconds.

The first time that you do register a station, the selected radio station will be registered to the preset number “01”. Thereafter, each radio station you select will be registered to the next empty (unused) preset number after the most recently registered number.

- To select a preset number for registering, press MEMORY once after tuning into the desired radio station, press PRESET to select a preset number, and then press MEMORY again.
- “Empty” (not in use) or the frequency currently registered
Selecting a preset station
Tune into a registered radio station by selecting its preset number.

1. Press FM or AM to select “TUNER” as the input source.
2. Press PRESET repeatedly to select the desired radio station.
   You can also enter a preset number (01 to 40) directly by using the numeric keys after pressing PRESET once.
   • “No Presets” appears when no radio stations are registered.
   • “Wrong Num.” appears when an invalid number is entered.
   • “Empty” appears when a preset number not in use is entered.

Clearing preset stations
Clear radio stations registered to the preset numbers.

1. Press FM or AM to select “TUNER” as the input source.
2. Press OPTION.
3. Use the cursor keys to select “Clear Preset” and press ENTER.
4. Use the cursor keys (△/▼) to select a preset station to be cleared and press ENTER.
   If the preset station is cleared, “Cleared” appears and then the next in-use preset number is displayed.
5. Repeat step 4 until all desired preset stations are cleared.
6. To exit from the menu, press OPTION.
Radio Data System tuning
(U.K. and Europe models only)
Radio Data System is a data transmission system used by FM stations in many countries. The unit can receive various types of Radio Data System data, such as “Program Service”, “Program Type,” “Radio Text” and “Clock Time”, when it is tuned into a Radio Data System broadcasting station.

Displaying the Radio Data System information

1 Tune into the desired Radio Data System broadcasting station.
   • We recommend using “Auto Preset” to tune into the Radio Data System broadcasting stations (p.44).

2 Press INFO.
   Each time you press the key, the displayed item changes.

   About 3 seconds later, the corresponding information for the displayed item appears.

   ![Program Service](image)
   ![Program Type](image)
   ![Radio Text](image)
   ![Clock Time](image)

Traffic information station (frequency)

Receiving traffic information automatically

When “TUNER” is selected as the input source, the unit automatically receives traffic information. To enable this function, follow the procedure below to set the traffic information station.

1 When “TUNER” is selected as the input source, press OPTION.

2 Use the cursor keys to select “Traffic Program” (TrafficProgram) and press ENTER.
   The traffic information station search will start in 5 seconds. Press ENTER again to start the search immediately.
   • To search upward/downward from the current frequency, press the cursor keys (△/▽) while “READY” is displayed.
   • To cancel the search, press RETURN.
   • Texts in parentheses denote indicators on the front display.
   The following screen appears for about 3 seconds when the search finishes.

   ![Traffic Program](image)
   ![Traffic Type](image)
   ![Traffic Text](image)
   ![Traffic Clock](image)

   • “TP Not Found” appears for about 3 seconds when no traffic information stations are found.
Playing back iPod music

You can play back iPod music on the unit using a USB cable supplied with the iPod.

⚠️
- An iPod may not be detected by the unit or some features may not be compatible, depending on the model or software version of the iPod.
- To play back iPod videos on the unit, an Apple Composite AV Cable (not supplied) is required. Connect the USB and composite video plugs of the Apple Composite AV cable to the USB jack and VIDEO AUX (VIDEO) jack of the unit, and connect your TV and the unit with a video pin cable (p.22). To select a video, operate the iPod itself in the simple play mode (p.49).

Connecting an iPod

Connect your iPod to the unit with the USB cable supplied with the iPod.

1 Connect the USB cable to the iPod.

2 Connect the USB cable to the USB jack.

Supported iPod (as of December 2012)
- iPod touch (1st, 2nd, 3rd and 4th generation)
- iPod nano (2nd, 3rd, 4th, 5th and 6th generation)
- iPhone 4S, iPhone 4, iPhone 3GS, iPhone 3G, iPhone
- iPad (3rd generation), iPad 2, iPad

The unit (front)

- The iPod charges while it is connected to the unit. If you set the unit to standby mode while the iPod is charging, the iPod continues to charge up to 4 hours. If “Network Standby” (p.81) in the “Setup” menu is set to “On”, it continues to change without limit.

⚠️
- Disconnect the iPod from the USB jack when it is not in use.
Playback of iPod content

Follow the procedure below to operate the iPod contents and start playback.
You can control the iPod with the menu displayed on the TV screen.

- Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display, or directly operate the iPod itself in the simple play mode (p.49).
- "_" (underscore) will be displayed for characters not supported by the unit.

1 Press USB to select “USB” as the input source.
The browse screen is displayed on the TV.

- If playback is ongoing on your iPod, the playback screen is displayed.

2 Use the cursor keys to select an item and press ENTER.
If a song is selected, playback starts and the playback screen is displayed.

- To return to the previous screen, press RETURN.
- To switch between the browse and playback screens during playback, press DISPLAY.
- To operate the iPod manually to select content or control playback, switch to the simple play mode (p.49).

### Browse screen

1 List name
2 Contents list
   Displays the list of iPod content. Use the cursor keys to select an item and press ENTER to confirm the selection.
3 Item number/total
4 Status indicators
   Display the current repeat/shuffle settings (p.50) and playback status (such as play/pause).
5 Operation menu
   Press the cursor key (>) and then use the cursor keys (△/▽) to select an item. Press ENTER to confirm the selection.

# Repeat/shuffle settings

You can configure the repeat/shuffle settings of your iPod.

- During simple play, configure the repeat/shuffle settings directly on your iPod or press MODE to display the TV menu screen and then follow the procedure below.

1. **When “USB” is selected as the input source, press OPTION.**

2. **Use the cursor keys to select “Shuffle” (Shuffle) or “Repeat” (Repeat) and press ENTER.**

   - To return to the previous screen during menu operations, press RETURN.
   - Texts in parentheses denote indicators on the front display.

3. **Use the cursor keys (</>/) to select a setting.**

Playing back music stored on a USB storage device

You can play back music files stored on a USB storage device on the unit. Refer to the instruction manuals for the USB storage device for more information.

The unit supports USB mass storage class devices (FAT16 or FAT32 format).

⚠ The unit supports WAV (PCM format only), MP3, WMA, MPEG-4 AAC and FLAC files (1- or 2-channel audio only).

⚠ The unit is compatible with sampling rate of up to 192 kHz for WAV and FLAC files, and 48 kHz for other files.

⚠ Some features may not be compatible, depending on the model or manufacturer of the USB storage device.

⚠ Digital Rights Management (DRM) contents cannot be played back.

Connecting a USB storage device

1 Connect the USB storage device to the USB jack.

The unit (front)

⚠ If the USB storage device contains many files, it may take time to load them. In this case, “Loading...” appears in the front display.

⚠ Disconnect the USB storage device from the USB jack when it is not in use.

⚠ Stop playback of the USB storage device before disconnecting it from the USB jack.

⚠ You cannot connect the PC to the USB jack of the unit.

Playback of USB storage device contents

Follow the procedure below to operate the USB storage device contents and start playback.

You can control the USB memory device with the menu displayed on the TV screen.

⚠ Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.

⚠ “_” (underscore) will be displayed for characters not supported by the unit.

1 Press USB to select “USB” as the input source.

The browse screen is displayed on the TV.

⚠ If playback is ongoing on your USB storage device, the playback screen is displayed.
2 Use the cursor keys to select an item and press ENTER.
If a song is selected, playback starts and the playback screen is displayed.

- To return to the previous screen, press RETURN.
- To switch between the browse and playback screens during playback, press DISPLAY.
- Files not supported by the unit cannot be selected.

4 To exit from the menu, press OPTION.
You can play back music files stored on your PC or DLNA-compatible NAS on the unit.

⚠️ To use this function, the unit and your PC must be connected to the same router (p.28). You can check whether the network parameters (such as the IP address) are properly assigned to the unit in “Information” (p.80) in the “Setup” menu.

- The unit supports playback of WAV (PCM format only), MP3, WMA, MPEG-4 AAC and FLAC files.
- The unit is compatible with sampling rates of up to 192 kHz for WAV and FLAC files, and 48 kHz for other files.
- To play back FLAC files, you need to install server software that supports sharing of FLAC files via DLNA on your PC or use a NAS that supports FLAC files.

Media sharing setup

To play back music files stored on your PC or DLNA-compatible NAS, first you need to configure the media sharing setting on each music server.

- For a PC with Windows Media Player installed

  1. Check that Windows Media Player 11 or later is installed on your PC.

  2. In the media sharing settings, enable media sharing and allow media to be shared with the device.

- For a PC or a NAS with other DLNA server software installed

  Refer to the instruction manual for the device or software and configure the media sharing settings.

Playback of PC music contents

Follow the procedure below to operate the PC music contents and start playback.

You can control the PC/NAS with the menu displayed on the TV screen.

⚠️ Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.

 underscore will be displayed for characters not supported by the unit.

1. Press NET repeatedly to select “SERVER” as the input source.
   The browse screen is displayed on the TV.

2. Use the cursor keys to select a music server and press ENTER.

   - If playback of a music file selected from the unit is ongoing on your PC, the playback screen is displayed.
3 Use the cursor keys to select an item and press ENTER.
If a song is selected, playback starts and the playback screen is displayed.

• To return to the previous screen, press RETURN.
• To switch between the browse and playback screens during playback, press DISPLAY.
• Files not supported by the unit cannot be selected.

4. **To exit from the menu, press OPTION.**
Listening to Internet radio

You can listen to Internet radio stations from all over the world. You can control the Internet radio with the menu displayed on the TV screen.

- Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.
- To use this function, the unit must be connected to the Internet (p.28). You can check whether the network parameters (such as the IP address) are properly assigned to the unit in “Information” (p.80) in the “Setup” menu.
- This service may be discontinued without notice.
- You may not be able to receive some Internet radio stations.
- The unit uses the vTuner Internet radio station database service.

1 Press NET repeatedly to select “NET RADIO” as the input source.

The browse screen is displayed on the TV.

2 Use the cursor keys to select an item and press ENTER.

If an Internet radio station is selected, playback starts and the playback screen is displayed.

- To return to the previous screen, press RETURN.
- To switch between the browse and playback screens during playback, press DISPLAY.
- You can register your favorite Internet radio stations to the “Bookmarks” folder by selecting “NET RADIO” as the input source on the unit and then accessing the following website with the web browser on your PC. To use this feature, you need the vTuner ID of the unit and your e-mail address to create your personal account. You can check the vTuner ID (MAC address of the unit) in “Information” (p.80) in the “Setup” menu.

The AirPlay function allows you to play back iTunes/iPod music on the unit via network.

To use this function, the unit and your PC or iPod must be connected to the same router (p.28). You can check whether the network parameters (such as the IP address) are properly assigned to the unit in “Information” (p.80) in the “Setup” menu.

**Playback of iTunes/iPod music contents**

Follow the procedure below to play back iTunes/iPod music contents on the unit.

1. **Turn on the unit, and start iTunes on the PC or display the playback screen on the iPod.**
   - If the iTunes/iPod recognizes the unit, the AirPlay icon ( ) appears.
   - If the icon does not appear, check whether the unit and PC/iPod are connected to the router properly.

2. **On the iTunes/iPod, click (tap) the AirPlay icon and select the unit (network name of the unit) as the audio output device.**
   - The playback screen is available only when your TV is connected to the unit via HDMI.

3. **Select a song and start playback.**
   - The unit automatically selects “AirPlay” as the input source and starts playback.
   - The playback screen is displayed on the TV.

**Supported iTunes/iPod (as of December 2012)**

- iTunes 10.2.2 or later (Windows/Mac)
- iPod touch, iPhone or iPad with iOS 4.3.3 or later
You can turn on the unit automatically when starting playback on iTunes or iPod by setting “Network Standby” (p.81) in the “Setup” menu to “On”.

You can edit the network name (the unit's name on the network) displayed on iTunes/iPod in “Network Name” (p.81) in the “Setup” menu.

If you select the other input source on the unit during playback, playback on the iTunes/iPod stops automatically.

You can adjust the unit’s volume from the iTunes/iPod during playback. To disable volume controls from iTunes/iPod, set “Volume Interlock” (p.67) in the “Option” menu to “Off”.

Caution

When you use iTunes/iPod controls to adjust volume, the volume may be unexpectedly loud. This could result in damage to the unit or speakers. If the volume suddenly increases during playback, stop playback on the iTunes/iPod immediately.

■ Playback screen

Use the following remote control keys to control playback.

<table>
<thead>
<tr>
<th>External device operation keys</th>

<td>Skips forward/backward.</td>
</tr>
</tbody>
</table>

To control iTunes playback with the remote control of the unit, you need to configure the iTunes preferences to enable iTunes control from remote speakers in advance.

iTunes (example of English version)

Check this box

Allow iTunes audio control from remote speakers

Playback screen

1. Playback indicator
2. Playback information

Displays the artist name, album name, song title, and elapsed time/song length.
**Playing back music in multiple rooms (RX-V575 only)**

The Zone A/B function allows you to play back an input source in the room where the unit is installed (Zone A) and in another room (Zone B).

For example, you can turn on Zone A (turn off Zone B) when you are in the living room, and turn on Zone B (turn off Zone A) when you are in the study room. Also, you can turn on both zones when you want to enjoy the same input source in those rooms simultaneously.

- Multichannel sources are mixed down to 2 channels and output to the zone B.
- The same input source is applied to both Zone A and Zone B.
- By default, the volume for Zone B changes in conjunction with the volume for Zone A. If there is volume difference between Zone A/B, you can correct it in “ZoneB Trim” in the “Option” menu (p.62). Also, you can adjust the volume for Zone B separately (p.62).
- You can automatically enable/disable the audio output to Zone A/B in conjunction with a scene selection (p.36)

### Preparing Zone B

Connect the device that will be used in Zone B to the unit.

**Caution**

- Remove the unit’s power cable from the AC wall outlet before connecting speakers.
- Ensure that the core wires of the speaker cable do not touch one another or come into contact with the unit’s metal parts. Doing so may damage the unit or the speakers. If the speaker cables short circuit, “Check SP Wires” will appear on the front display when the unit is turned on.

Connect the speakers placed in Zone B to the unit with speaker cables.

To utilize the SURROUND BACK/BI AMP/ZONE B jacks for Zone B speakers, set “Power Amp Assign” (p.71) in the “Setup” menu to “Zone B” after connecting the power cable to an AC wall outlet.
Basic playback procedure

1 Press ZONE A or ZONE B to enable/disable audio output to Zone A or Zone B.
   “SP A” lights up in the front display when the Zone A output is enabled and “SP B” lights up when the Zone B output is enabled.

2 Use the input selection keys to select an input source.

3 Start playback on the external device or select a radio station.

4 Press VOLUME to adjust the volume.

Correcting volume difference between Zone A and Zone B

If you are bothered by volume difference between Zone A/B, follow the procedure below to adjust the volume for Zone B.

1 Press OPTION.

2 Use the cursor keys to select “Volume Trim” (Volume Trim) and press ENTER.

   • To return to the previous screen during menu operations, press RETURN.
   • Text in parentheses denotes indicators on the front display.

3 Use the cursor keys (△/▼) to select “ZoneB Trim” (ZB.Trim) and the cursor keys (◄/►) to adjust the setting.

   Setting range
   -10.0 dB to +10.0 dB (0.5 dB increments)
   Default
   0.0 dB

4 To exit from the menu, press OPTION.

Adjusting the volume for Zone B separately

You can separately adjust the volume for Zone B using the remote control when “ZoneB Volume” (p.77) in the “Setup” menu is set to “Async.”.

1 To set the remote control to the Zone B operation mode, while holding down the cursor key (►), hold down SCENE (TV) for more than 3 seconds.
   SOURCE/RECEIVER blinks twice.

2 Press VOLUME to adjust the volume for Zone B.

   • To mute the audio output to Zone B, press MUTE.

3 To set the remote control to the Zone A operation mode, while holding down the cursor key (►), hold down SCENE (BD/DVD) for more than 3 seconds.
   SOURCE/RECEIVER blinks twice.
Viewing the current status

Switching information on the front display

1 Press INFO.
Each time you press the key, the displayed item changes.

About 3 seconds later, the corresponding information for
the displayed item appears.

* Available items vary depending on the selected input source. The displayed
item can also be applied separately to each input source group.

<table>
<thead>
<tr>
<th>Input source group</th>

</table>

* The name of the audio decoder currently activated is displayed. If no audio
decoder is activated, “Decoder Off” appears.
You can configure separate playback settings for different playback sources. This menu is available on the front panel (or on the TV screen), allowing you to easily configure settings during playback.

1. Press OPTION.

2. Use the cursor keys to select an item and press ENTER.
   • To return to the previous screen during menu operations, press RETURN.

3. Use the cursor keys (↑/↓) to select a setting.

4. To exit from the menu, press OPTION.

Option menu items

- Available items vary depending on the selected input source.
- Text in parentheses denotes indicators on the front display.
- Depending on the region of purchase, some menu items for audio streaming services are also available. For details, refer to each manual on the supplied CD-ROM.

</table>
Tone Control (Tone Control)

Adjusts the high-frequency range (Treble) and low-frequency range (Bass) of sounds.

- **Choices**
  - Treble (Treble), Bass (Bass)

- **Setting range**
  - -6.0 dB to Bypass (Bypass) to +6.0 dB, *0.5 dB increments

- **Default**
  - Bypass (Bypass)

**Note**
- If you set an extreme value, sounds may not match those from other channels.

Adjusting with the front panel controls

1. Press TONE CONTROL to select “Treble” or “Bass”.
2. Press PROGRAM to make an adjustment.

DSP/Surround (DSP/Surround)

Configures the sound field program and surround settings.

DSP Level (DSP Level)

Adjusts the sound field effect level.

- **Setting range**
  - -6 dB to +3 dB (1 dB increments)

- **Default**
  - 0 dB

Adaptive DRC (A.DRC)

Sets whether the dynamic range (from maximum to minimum) is automatically adjusted when the volume level is adjusted. When it is set to “On”, it is useful for listening to playback at a low volume at night.

- **Settings**
  - **On (On)**: Automatically adjusts the dynamic range.
  - **Off (Off)** (default): The dynamic range is not automatically adjusted.

If “On” is selected, the dynamic range becomes narrow at a low volume and wide at a high volume.

Extended Surround (EXTD)

(RX-V575 only)

Selects how to play back 5.1- to 7.1-channel sources when surround back speakers are used.

- **Settings**
  - **Auto (Auto)** (default): Automatically selects the most suitable decoder if signals that contain surround back channel signals are input, and reproduces the signals in 6.1- or 7.1-channel. If two surround back speakers are connected, the unit reproduces the 5.1-channel signals in 7.1-channel.
  - **PLIIx Movie** (**PLIIxMo**: Always reproduces signals in 7.1-channel using the Dolby Pro Logic IIx Movie decoder. This setting is available only when two surround back speakers are connected.
  - **PLIIx Music** (**PLIIxMu**: Always reproduces signals in 6.1- or 7.1-channel using the Dolby Pro Logic IIx Music decoder. This setting is available only when one or two surround back speakers are connected.
  - **EX/ES (EX/ES)**: Automatically selects the Dolby EX or DTS-ES decoder, and reproduces signals in 6.1- or 7.1-channel.
  - **Off (Off)**: Always reproduces signals in their original channels. (Even when DTS-ES or Dolby Digital Surround EX signal is input, the unit reproduces the signal in 5.1-channel.)
Some early Dolby Digital EX or DTS-ES sources do not contain a flag for reproducing surround back channel. We recommend you set “Extended Surround” to “PLIIx Movie” or “EX/ES” when playing back those sources.

**Enhancer (Enhancer)**
Enables/disables Compressed Music Enhancer (p.42).

- This setting is applied separately to each input source.
- You can also use ENHANCER on the remote control to enable/disable Compressed Music Enhancer (p.42).

<table>
<thead>
<tr>
<th>Settings</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (Off)</td>
<td>Disables Compressed Music Enhancer.</td>
</tr>
<tr>
<td>On (On)</td>

<td>Enables the “Lipsync” adjustment.</td>
</tr>
</tbody>
</table>

**Signal Info (Signal Info)**
Displays information about the video/audio signal.

<table>
<thead>
<tr>
<th>Choices</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Format (FORMAT)</td>
<td>Audio format of the input signal</td>
</tr>
<tr>
<td>Channel (CHAN)</td>
<td>The number of source channels in the input signal (front/surround/LFE) For example, “3/2/0.1” means 3 front channels, 2 surround channels, and LFE.</td>
</tr>
<tr>
<td>Sampling (SAMPL)</td>
<td>The number of samples per second of the input digital signal</td>
</tr>
<tr>
<td>Bitrate (B RATE)</td>
<td>The amount of data per second of the input bitstream signal</td>
</tr>
<tr>
<td>Input (V IN)</td>
<td>Type and resolution of input signal</td>
</tr>
<tr>
<td>Output (V OUT)</td>
<td>Type and resolution of output signal</td>
</tr>
</tbody>
</table>

- To switch the information on the front display, press the cursor keys (△/▼) repeatedly.

**Volume Trim (Volume Trim)**
Fine-adjusts volume difference between input sources or subwoofer volume.

**Input Trim (In.Trim)**
Corrects volume differences between input sources. If you are bothered by volume differences when switching between input sources, use this function to correct it.

- This setting is applied separately to each input source.

<table>
<thead>
<tr>
<th>Setting range</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>-6.0 dB to +6.0 dB (0.5 dB increments)</td>
<td>0.0 dB</td>
</tr>
</tbody>
</table>

**Subwoofer Trim (SW.Trim)**
Fine-adjusts the subwoofer volume.

<table>
<thead>
<tr>
<th>Setting range</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>-6.0 dB to +6.0 dB (0.5 dB increments)</td>
<td>0.0 dB</td>
</tr>
</tbody>
</table>
**Audio In (Audio In)**

Combines the video jack of the selected input source (HDMI 1–5 or AV 1–2) with an audio jack of others. For example, use this function in the following cases.

- Connecting a playback device that supports HDMI video output, but not HDMI audio output
- Connecting a playback device that has component video jacks and analog stereo jacks (such as game consoles)

**Input sources**
HDMI 1–5, AV 1–2

**Setup procedure**

**(To input audio through a digital optical jack)**
Select "AV 1" or "AV 4" and connect the device to the unit's corresponding audio jacks with a digital optical cable.

**(To input audio through a digital coaxial jack)**
Select "AV 2" or "AV 3" and connect the device to the unit's corresponding audio jacks with a digital coaxial cable.

**(To input audio through analog audio jacks)**
Select "AV 5", "AV 6", or "AUDIO", and connect the device to the unit's corresponding audio jacks with a stereo pin cable.

**Video Out (Video Out)**

Selects a video to be output with radio sounds.

**Settings**

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (Off) (default)</td>
<td>Does not output video.</td>
</tr>
<tr>
<td>HDMI 1–5, AV 1–6, V-AUX</td>
<td>Outputs video input through the corresponding video input jacks.</td>
</tr>
</tbody>
</table>

**Volume Interlock (Interlock)**

Enables/disables volume controls from iTunes/iPod via AirPlay.

**Settings**

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (Off)</td>
<td>Disables volume controls from iTunes/iPod.</td>
</tr>
<tr>
<td>Limited (Ltd) (default)</td>
<td>Enables volume controls from iTunes/iPod within the limited range (-80 dB to 0 dB and mute).</td>
</tr>
<tr>
<td>Full (Full)</td>
<td>Enables volume controls from iTunes/iPod in the full range (-80 dB to +16.5 dB and mute).</td>
</tr>
</tbody>
</table>
You can configure the unit's various functions with the menu displayed on the TV screen.

- Operations with TV screen are available only when your TV is connected to the unit via HDMI. If not, carry out operations while viewing the front display.

1. Press SETUP.

2. Use the cursor keys to select a menu and press ENTER.

3. Use the cursor keys to select an item and press ENTER.

   - To return to the previous screen during menu operations, press RETURN.

4. Use the cursor keys (△/▽) to select a setting and press ENTER.

5. To exit from the menu, press SETUP.

**Speaker**
Configures the speaker settings manually.

**Configuration**
Configures the output characteristics of the speakers.

- When you configure the speaker size, select “Large” if the woofer diameter of your speaker is 16 cm (6-1/4”) or larger or “Small” if it is smaller than 16 cm (6-1/4”).

**Power Amp Assign**
(RX-V575 only)
Selects a speaker system.
In addition to the 5.1- or 7.1-channel speaker system, various speaker configurations are possible using the Zone B speakers or bi-amp connection.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic (default)</td>
<td>Select this option when you use a normal speaker system (not using Zone B speakers or a bi-amp connection).</td>
</tr>
<tr>
<td>BI-AMP</td>
<td>Select this option when you connect front speakers that support bi-amp connections (p. 16).</td>
</tr>
<tr>
<td>Zone B</td>
<td>Select this option when you use Zone B speakers (p. 61) in addition to the speaker system in the main zone (Zone A).</td>
</tr>
</tbody>
</table>

**Subwoofer**
Selects whether or not a subwoofer is connected.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use (default)</td>
<td>Select this option when a subwoofer is connected. The subwoofer will produce LFE (low-frequency effect) channel audio and low-frequency components from other channels.</td>
</tr>
<tr>
<td>None</td>
<td>Select this option when no subwoofer is connected. The front speakers will produce LFE (low-frequency effect) channel audio and low-frequency components from other channels.</td>
</tr>
</tbody>
</table>

**Front**
Selects the size of the front speakers.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small (default)</td>
<td>Select this option for small speakers. The subwoofer will produce front channel low-frequency components (configurable in “Crossover”).</td>
</tr>
<tr>
<td>Large</td>
<td>Select this option for large speakers. The front speakers will produce all of the front channel frequency components.</td>
</tr>
</tbody>
</table>

“Front” is automatically set to “Large” when “Subwoofer” is set to “None”.

**Center**
Selects whether or not a center speaker is connected and its size.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small (default)</td>
<td>Select this option for small speakers. The subwoofer or front speakers will produce center channel low-frequency components (configurable in “Crossover”).</td>
</tr>
<tr>
<td>Large</td>
<td>Select this option for large speakers. The center speaker will produce all of the center channel frequency components.</td>
</tr>
<tr>
<td>None</td>
<td>Select this option when no center speaker is connected. The front speakers will produce center channel audio.</td>
</tr>
</tbody>
</table>
## Surround
Selects whether or not surround speakers are connected and their sizes.

### Settings

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small (default)</td>
<td>Select this option for small speakers. The subwoofer or front speakers will produce surround channel low-frequency components (configurable in &quot;Crossover&quot;).</td>
</tr>
<tr>
<td>Large</td>
<td>Select this option for large speakers. The surround speakers will produce all of the surround channel frequency components.</td>
</tr>
<tr>
<td>None</td>
<td>Select this option when no surround speakers are connected. The front speakers will produce surround channel audio. Virtual CINEMA DSP works when you select a sound program.</td>
</tr>
</tbody>
</table>

## Crossover
Sets the lower limit of the low-frequency components that can be output from a speaker whose size is set to “Small”. A frequency sound lower than the specified value will be produced from the subwoofer or front speakers.

### Settings

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal (default)</td>
<td>Does not reverse the subwoofer phase.</td>
</tr>
<tr>
<td>Reverse</td>
<td>Reverses the subwoofer phase.</td>
</tr>
</tbody>
</table>

## Subwoofer Phase
Sets the phase of the subwoofer. When the bass sound is lacking or unclear, switch the subwoofer phase.

### Settings

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal (default)</td>
<td>Does not reverse the subwoofer phase.</td>
</tr>
<tr>
<td>Reverse</td>
<td>Reverses the subwoofer phase.</td>
</tr>
</tbody>
</table>

## Extra Bass
Sets the speakers to produce the front channel low-frequency components.

### Settings

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (default)</td>
<td>Depending on the size of the front speakers, either the subwoofer or front speakers produce the front channel low-frequency components.</td>
</tr>
<tr>
<td>On</td>
<td>Both the front speakers and subwoofer produce the front channel low-frequency components.</td>
</tr>
</tbody>
</table>

- This setting is not available when “Subwoofer” is set to “None”, or when “Front” is set to “Small”.

• “Surround Back” is automatically set to “None” when “Power Amp Assign” is set to “Bi-AMP” or “Zone B”, or when “Surround” is set to “None”.

• “Surround Back” is automatically set to “None” when “Power Amp Assign” is set to “Bi-AMP” or “Zone B”, or when “Surround” is set to “None”.

• If the volume and crossover frequency are adjustable on your subwoofer, set the volume to half and crossover frequency to maximum.
**Distance**
Sets the distance between each speaker and listening position so that sounds from the speakers reach the listening position at the same time. First, select the unit of distance from “Meter” or “Feet”.

- **Choices**
  - Front L, Front R, Center, Surround L, Surround R, Surround Back L (RX-V575 only), Surround Back R (RX-V575 only), Subwoofer

- **Setting range**
  - 0.30 m to 24.00 m (1.0 ft to 80.0 ft), *0.05 m (0.2 ft) increments

- **Default**
  - Front L, Front R, Subwoofer: 3.00 m (10.0 ft)
  - Center: 2.60 m (8.6 ft)
  - Others: 2.40 m (8.0 ft)

**Level**
Adjusts the volume of each speaker.

- **Choices**
  - Front L, Front R, Center, Surround L, Surround R, Surround Back L (RX-V575 only), Surround Back R (RX-V575 only), Subwoofer

- **Setting range**
  - -10.0 dB to +10.0 dB (0.5 dB increments)

- **Default**
  - Front L, Front R, Subwoofer: 0.0 dB
  - Others: -1.0 dB

**Equalizer**
Adjusts the tone with an equalizer.

- **EQ Select**
  Selects the type of equalizer to be used.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PEQ</td>
<td>Applies the parametric equalizer values obtained by the YPAO measurement (p.31).</td>
</tr>
<tr>
<td>GEQ (default)</td>
<td>Select this option when you want to adjust the equalizer manually. For details, see “Manual equalizer adjustment”.</td>
</tr>
<tr>
<td>Off</td>
<td>Does not use the equalizer.</td>
</tr>
</tbody>
</table>

**Manual equalizer adjustment**

1. Set “EQ Select” to “GEQ”.
2. Use the cursor keys (△/▼) to select “Channel” and the cursor keys (◄/►) to select the desired speaker channel.
3. Use the cursor keys (△/▼) to select the desired band (frequency) and the cursor keys (◄/►) to adjust the gain.

- **Setting range**
  - -6.0 dB to +6.0 dB

4. To exit from the menu, press SETUP.

**Test Tone**
Enables/disables the test tone output. Test tone output helps you to adjust the speaker balance or equalizer while confirming its effect.

HDMI

Configures the HDMI settings.

![Image of HDMI settings configuration menu]

## Configuration

- **HDMI Control**
  Enables/disables HDMI Control (p.100).

  **Settings**
  - Off (default): Disables HDMI Control.
  - On: Enables HDMI Control.

  **Configuring the settings**: When “On” is selected, configure the settings in “TV Audio Input”, “Standby Sync”, “ARC”, and “SCENE”.

- **Audio Output**
  Selects a device to output audio.

  **Settings**
  - Off (default): Disables audio output from the TV.
  - On: Enables audio output from the TV.

  - **Note**: Using HDMI Control means the TV consumes more power than when “Off” is selected.

- **Amp**
  Enables/disables the audio output from the speakers connected to the unit.

  **Settings**
  - Off (default): Disables the audio output from the speakers.
  - On: Enables the audio output from the speakers.

- **HDMI OUT (TV)**
  Enables/disables the audio output from a TV connected to the HDMI OUT jack.

  **Settings**
  - Off (default): Disables the audio output from the TV.
  - On: Enables the audio output from the TV.

- **Standby Through**
  Select whether to output videos/audio (input through HDMI jacks) to the TV when the unit is in standby mode. If this function is set to “On”, you can use the input selection keys (HDMI 1–5) to select an HDMI input even when the unit is in standby mode (the standby indicator on the unit blinks).

  **Settings**
  - Off (default): Does not output videos/audio to the TV.
  - On: Outputs videos/audio to the TV (The unit consumes more power than when “Off” is selected.)

  - **Note**: This setting is available only when “HDMI Control” is set to “Off”.

- **TV Audio Input**
  Selects an audio input jack of the unit to be used for TV audio input when “HDMI Control” is set to “On”. The unit's input source automatically switches to TV audio when the TV input is switched to its built-in tuner.

  **Settings**
  - AV 1–6, AUDIO
  - Default: AV 4

  - **Note**: When using ARC to input TV audio to the unit, you cannot use the input jacks selected here for connecting an external device because the input will be used for TV audio input.
🧰 **Standby Sync**

Select whether to use HDMI control to link the standby behavior of the TV and the unit when “HDMI Control” is set to “On”.

**Settings**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not set the unit to standby mode when the TV is turned off.</td>
</tr>
<tr>
<td>On</td>
<td>Sets the unit to standby mode when the TV is turned off.</td>
</tr>
<tr>
<td>Auto (default)</td>
<td>Sets the unit to standby mode when the TV is turned off only when the unit is receiving TV audio or HDMI signals.</td>
</tr>
</tbody>
</table>

🧰 **ARC**

Enables/disables ARC (p.18) when “HDMI Control” is set to “On”.

**Settings**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disables ARC.</td>
</tr>
<tr>
<td>On (default)</td>
<td>Enables ARC.</td>
</tr>
</tbody>
</table>

⚠️ You do not need to change this setting normally. If case noises are produced from the speakers connected to the unit because TV audio signals input to the unit via ARC are not supported by the unit, set “ARC” to “Off” and use the TV’s speakers.

🧰 **SCENE**

Enables/disables SCENE link playback when “HDMI Control” is set to “On”. When SCENE link playback is enabled, HDMI Control-compatible devices connected to the unit via HDMI automatically works as follows, with a scene selection.

- TV: turning on and displaying video from the playback device
- Playback device: starting playback

**Choices (SCENE keys)**

| BD/DVD, TV, NET, RADIO |

**Settings**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disables SCENE link playback for the selected SCENE key.</td>
</tr>
<tr>
<td>On</td>
<td>Enables SCENE link playback for the selected SCENE key.</td>
</tr>
</tbody>
</table>

Default

| BD/DVD, TV: On       | NET, RADIO: Off       |

⚠️ SCENE link playback may not work properly due to the compatibility between devices. We recommend using TV and playback devices from the same manufacturer so that HDMI Control works more effectively.

---

## Sound

Configures the audio output settings.

### DSP Parameter

Configures the surround decoder settings.

### CINEMA DSP 3D Mode

Enables/disables CINEMA DSP 3D (p.40). If this function is set to “On”, CINEMA DSP 3D functions with the selected sound programs (except 2ch Stereo and 7ch/5ch Stereo).

**Settings**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disables CINEMA DSP 3D.</td>
</tr>
<tr>
<td>On (default)</td>
<td>Enables CINEMA DSP 3D.</td>
</tr>
</tbody>
</table>

### Panorama

Enables/disables the broadening effect of the front sound field. When this function is enabled, you can wrap front right/left channel sounds around the field and generate a spacious sound field in combination with the surround sound field. This setting is effective when “PLII Music” or “PLIIx Music” (RX-V575 only) is selected.

**Settings**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disables the broadening effect of the front sound field.</td>
</tr>
<tr>
<td>On</td>
<td>Enables the broadening effect of the front sound field.</td>
</tr>
</tbody>
</table>
**Center Width**
Adjusts the broadening effect of the center sound field. Higher to enhance the broadening effect, and lower to reduce it (closer to center). This setting is effective when “PLII Music” or “PLIIx Music” (RX-V575 only) is selected.

- **Setting range**: 0 to 7
- **Default**: 3

**Dimension**
Adjusts the difference in level between the front and surround sound fields. Higher to strengthen the front sound field and lower to strengthen the surround sound field. This setting is effective when “PLII Music” or “PLIIx Music” (RX-V575 only) is selected.

- **Setting range**: -3 to +3
- **Default**: 0

**Center Image**
Adjusts the center orientation level (broadening effect) of the front sound field. Higher to strengthen the center orientation level (less broadening effect) and lower to weaken (more broadening effect). This setting is effective when “Neo:6 Music” is selected.

- **Setting range**: 0.0 to 1.0
- **Default**: 0.3

---

**Lipsync**
Adjusts the delay between video and audio output.

- You can enable/disable the Lipsync function by input sources in “Lipsync” (p.66) in the “Option” menu.

**Select**
Selects the method to adjust the delay between video and audio output.

- **Setting range**
  - **Manual**: Select this option when you want to adjust the delay between video and audio output manually. Adjust the audio output timing in “Adjustment”.
  - **Auto (default)**: Adjusts the delay between video and audio output automatically when a TV that supports an automatic lipsync function is connected to the unit via HDMI. If necessary, you can fine-adjust the audio output timing in “Adjustment”.

- “Select” is automatically set to “Manual” depending on the TV connected to the unit.

**Adjustment**
Adjusts the delay between video and audio output manually when “Select” is set to “Manual”. You can fine-adjust the audio output timing when “Select” is set to “Auto”.

- **Setting range**: 0 ms to 250 ms (1 ms increments)
- **Default**: 0 ms
■ Volume
Configures the volume settings.

❑ Dynamic Range
Selects the dynamic range adjustment method for bitstream audio (Dolby Digital and DTS signals) playback.

Settings
- Maximum (default) Produces audio without adjusting the dynamic range.
- Standard Optimizes the dynamic range for regular home use.
- Min/Auto Sets the dynamic range for clear sound even at night or at low volumes. When playing back Dolby TrueHD signals, the dynamic range is automatically adjusted based on the input signal information.

❑ Max Volume
Sets the maximum volume to prevent excessive loudness.

Settings
- Setting range -30.0 dB to +15.0 dB (5.0 dB increments), +16.5 dB
- Default +16.5 dB

❑ Initial Volume
Sets the initial volume when the receiver is turned on.

Settings
- Off (default) Sets the level to the volume level of the unit when it last entered standby mode.
- Mute Sets the unit to mute the audio output.
- -80.0 dB to +16.5 dB (0.5 dB increments) Sets the level to the specified volume level.

❑ ZoneB Volume
Sets whether to adjust the volume for Zone B in conjunction with the volume for Zone A.

Settings
- Sync. (default) Adjusts the volume for Zone B in conjunction with the volume for Zone A.
- Async. Does not adjust the volume for Zone B in conjunction with the volume for Zone A. Adjust the volume for Zone B separately (p.62).

ECO
Configures the power supply settings.

❑ Auto Power Standby
Sets the amount of time for the auto-standby function. If you do not operate the unit for the specified time, the unit will automatically go into standby mode.

Settings
- Off (default) Does not set the unit to standby mode automatically.
- 2 hours, 4 hours, 8 hours, 12 hours Sets the unit to standby mode when you have not operated the unit for the specified time. For example, when “2 hours” is selected, the unit will switch to standby mode if you do not operate it for 2 hours.
- Default U.K. and Europe models: 8 hours Other models: Off

- Just before the unit enters standby mode, “AutoPowerStdby” appears and then countdown starts in the front display.
**ECO Mode**

Enables/disables the eco (power saving) mode. When the eco mode is enabled, you can reduce the unit’s power consumption.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (default)</td>
<td>Disables the eco mode.</td>
</tr>
<tr>
<td>On</td>
<td>Enables the eco mode.</td>
</tr>
</tbody>
</table>

- Be sure to press ENTER to restart the unit after selecting a setting. The new setting will take effect after the unit is restarted.
- When “ECO Mode” is set to “On”, the front panel display may become dark.
- If you want to play audio at high volume, set “ECO Mode” to “Off”.

**Function**

Configures the functions that make the unit easier to use.

**Input Rename**

Changes the input source name displayed on the front display.

**Input sources**

HDMI 1–5, AV 1–6, AUDIO, USB, V-AUX

**Procedure**

1. **Use the cursor keys (△/▼) to select an input source to be renamed and press ENTER.**
   - To select a name from the presets, use the cursor keys (△/▼) to select an input source and the cursor keys (◄/►) to select a preset name.

2. **Use the cursor keys (◄/►) to move the edit position and the cursor keys (△/▼) to select a character.**

3. **To confirm the new name, press ENTER.**
   - To cancel the entry, press RETURN.
4 To change another input source name, repeat steps 1 to 3.
5 To exit from the menu, press SETUP.

**Dimmer**
Adjusts the brightness of the front display.

- **Setting range**
  -4 to 0 (higher to brighten)
- **Default**
  0

- The front display may become dark when “ECO Mode” (p.78) is set to “On”.

**Memory Guard**
Prevents accidental changes to the settings.

- **Settings**
  - **Off (default)**
    - Does not protect the settings.
  - **On**
    - Protects the settings until "Off" is selected.

- When “Memory Guard” is set to “On”, the lock icon (🔒) is displayed on the menu screen.

**DC OUT**
Configures the DC OUT jack setting.

- **Power Mode**
  Selects how to supply power to the Yamaha AV accessory connected to the DC OUT jack.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not protect the settings.</td>
</tr>
<tr>
<td>On</td>
<td>Protects the settings until &quot;Off&quot; is selected.</td>
</tr>
</tbody>
</table>

- **Continuous (default)** Supplies power through the DC OUT jack continuously regardless of the power state (on/standby) of the unit.
- **Power Sync.** Supplies power through the DC OUT jack only when the unit is turned on.
Network

Configures the network settings.

Information

Displays the network information on the unit.

<table>
<thead>
<tr>
<th>Status</th>
<th>The connection status of the NETWORK jack</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAC Address</td>
<td>MAC address</td>
</tr>
<tr>

<td>The IP address of the secondary DNS server</td>
</tr>
<tr>
<td>vTuner ID</td>
<td>The ID of the Internet radio (vTuner)</td>
</tr>
</tbody>
</table>

IP Address

Configures the network parameters (such as IP address).

DHCP

Select whether to use a DHCP server.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not use a DHCP server. Configure the network parameters manually. For details, see “Manual network settings”.</td>
</tr>
<tr>
<td>On (default)</td>
<td>Uses a DHCP server to automatically obtain the unit’s network parameters (such as IP address).</td>
</tr>
</tbody>
</table>

Manual network settings

1. Set “DHCP” to “Off”.
2. Use the cursor keys (△/▽) to select a parameter type.

<table>
<thead>
<tr>
<th>Parameter Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP Address</td>
<td>Specifies an IP address.</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>Specifies a subnet mask.</td>

<tr>
<td>DNS Server (P)</td>
<td>Specifies the IP address of the primary DNS server.</td>
</tr>
<tr>
<td>DNS Server (S)</td>
<td>Specifies the IP address of the secondary DNS server.</td>
</tr>
</tbody>
</table>

3. Use the cursor keys (◄/►) to move the edit position and the cursor keys (△/▽) to select a value.
4. To exit from the menu, press SETUP.
### MAC Address Filter
Sets the MAC address filter to limit access to the unit from other network devices.

**Filter**
Enables/disables the MAC address filter.

**Settings**

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (default)</td>
<td>Disables the MAC address filter.</td>
</tr>
<tr>
<td>On</td>
<td>Enables the MAC address filter. In “MAC Address 1–10”, specify the MAC addresses of the network devices that will be permitted access to the unit.</td>
</tr>
</tbody>
</table>

**MAC Address 1–10**
Specifies the MAC addresses (up to 10) of the network devices that will be permitted access to the unit when “Filter” is set to “On”.

**Procedure**
1. Use the cursor keys (△/▽) to select an MAC address number (1 to 10).
2. Use the cursor keys («/») to move the edit position and the cursor keys (△/▽) to select a value.
3. To exit from the menu, press SETUP.

### DMC Control
Selects whether to allow DLNA-compatible Digital Media Controller (DMC) to control playback.

**Settings**

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disable</td>
<td>Does not allow DMCs to control playback.</td>
</tr>
<tr>
<td>Enable (default)</td>
<td>Allows DMCs to control playback.</td>
</tr>
</tbody>
</table>

**Network Standby**
Selects whether the unit can be turned on from other network devices (network standby).

**Settings**

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off (default)</td>
<td>Disables the network standby function.</td>
</tr>
<tr>
<td>On</td>
<td>Enables the network standby function. (The unit consumes more power than when “Off” is selected.)</td>
</tr>
</tbody>
</table>

**Network Name**
Edits the network name (the unit’s name on the network) displayed on other network devices.

**Procedure**
1. Press ENTER to enter the name edit screen.
2. Use the cursor keys («/») to move the edit position and the cursor keys (△/▽) to select a character.
3. To confirm the new name, press ENTER.
4. To exit from the menu, press SETUP.

* A Digital Media Controller (DMC) is a device that can control other network devices through the network. When this function is enabled, you can control playback of the unit from DMCs (such as Windows Media Player 12) on the same network.
Network Update
Updates the firmware via the network.

- Perform Update
Starts the process to update the unit's firmware. For details, see “Updating the unit’s firmware” (p.88).

- Firmware Version
Displays the version of the firmware installed on the unit.

- System ID
Displays the system ID number.

Language
Select an on-screen menu language.

<table>
<thead>
<tr>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>English (default)</td>
</tr>
<tr>
<td>日本語</td>
</tr>
<tr>
<td>Français</td>
</tr>
<tr>
<td>Deutsch</td>

</tr>
<tr>
<td>Русский</td>
</tr>
<tr>
<td>Italiano</td>
</tr>
<tr>
<td>中文</td>
</tr>
</tbody>
</table>

- Japanese and Chinese characters used in content information (such as song titles) cannot be displayed.
- The information on the front display is provided in English only.
Configuring the system settings (ADVANCED SETUP menu)

Configure the system settings of the unit while viewing the front display.

1. **Set the unit to standby mode.**
2. **While holding down STRAIGHT on the front panel, press (power).**
3. **Press PROGRAM to select an item.**
4. **Press STRAIGHT to select a setting.**
5. **Press (power) to set the unit to standby mode and turn it on again.**

The new settings take effect.

**ADVANCED SETUP menu items**

<table>
<thead>
<tr>
<th>Item</th>

<td>Updates the firmware.</td>
<td>84</td>
</tr>
<tr>
<td>VERSION</td>
<td>Checks the version of firmware currently installed on the unit.</td>
<td>84</td>
</tr>
</tbody>
</table>

**Changing the speaker impedance setting (SP IMP.)**

(U.S.A. and Canada models only)

<table>
<thead>
<tr>
<th>SP IMP.</th>
<th>8Ω MIN</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select this option when you connect 6-ohm speakers to the unit. You can also use 4-ohm speakers as the front speakers.</td>
<td></td>
</tr>
<tr>
<td>Select this option when you connect 8-ohm or higher speakers to the unit.</td>
<td></td>
</tr>
</tbody>
</table>

**Selecting the remote control ID (REMOTE ID)**

Change the unit’s remote control ID so that it matches the remote control’s ID (default: ID1). When using multiple Yamaha AV receivers, you can set each remote control with a unique remote control ID for its corresponding receiver.

<table>
<thead>
<tr>
<th>Settings</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>ID1 (default), ID2</td>
<td></td>
</tr>
</tbody>
</table>

**Changing the remote control ID of the remote control**

1. **To select ID1, while holding down the cursor key (◁), hold down SCENE (BD/DVD) for more than 3 seconds.**
2. **To select ID2, while holding down the cursor key (▷), hold down SCENE (TV) for more than 3 seconds.**

• The registered remote control codes (p.85) are not cleared even if you change the remote control ID.
Changing the FM/AM tuning frequency setting (TU)

(Asia and General models only)

**TU**: Select this when you want to adjust the FM frequency by 100-kHz steps and AM by 10-kHz steps.

**FM50/AM9 (default)**: Select this when you want to adjust the FM frequency by 50-kHz steps and AM by 9-kHz steps.

**Settings**

| FM100/AM10 | Select this when you want to adjust the FM frequency by 100-kHz steps and AM by 10-kHz steps. |
| FM50/AM9 (default) | Select this when you want to adjust the FM frequency by 50-kHz steps and AM by 9-kHz steps. |

Switching the video signal type (TV FORMAT)

**TV FORMAT**: NTSC

Switch the video signal type of HDMI output so that it matches to the format of your TV. Since the unit automatically selects the video signal type so that it matches to the TV, it is unnecessary to change the setting normally. Change the setting only when images on the TV screen do not appear correctly.

**Settings**

| NTSC, PAL |
| U.S.A., Canada, Korea and General models: NTSC |
| Other models: PAL |

Restoring the default settings (INIT)

**INIT**: Restores the default settings for the unit.

**CANCEL**: Does not perform an initialization.

Updating the firmware (UPDATE)

New firmware that provides additional features or product improvements will be released as needed. Updates can be downloaded from our website. If the unit is connected to the Internet, you can download the firmware via the network. For details, refer to the information supplied with updates.

**Firmware update procedure**

Do not perform this procedure unless firmware update is necessary. Also, make sure you read the information supplied with updates before updating the firmware.

1. Press STRAIGHT repeatedly to select “USB” or “NETWORK” and press INFO to start firmware update.

**Choices**

| USB | Update the firmware using a USB memory device. |
| NETWORK | Update the firmware via the network. |

**If the unit detects newer firmware over the network, the envelope icon (✉) will appear in the “Network Update” screen. In this case, you can also update the unit’s firmware by following the procedure in “Updating the unit’s firmware” (p.88).**

Checking the firmware version (VERSION)

Check the version of firmware currently installed on the unit.

**VERSION**: xx.xx

**You can also check the firmware version in “Network Update” (p.82) in the “Setup” menu.**

**It may take a while until the firmware version is displayed.**
Controlling external devices with the remote control

You can use the unit’s remote control to operate external devices (such as BD/DVD players) if you have registered the remote control code of the external device.

- You cannot control an external device that does not have a remote control sensor.
- Ensure that the remote control ID of the external device is set to “ID1”. If any other ID is selected, the remote control operations may not work properly.
- If the unit’s remote control is without batteries for more than 2 minutes, the registered codes may be cleared. If this happens, insert new batteries and register the codes again.
- Under the unit’s default settings, the amplifier code (Yamaha: 5098) is set for all the input selection keys. With this setting, you can control HDMI Control-compatible devices connected to the unit with the remote control. (This function may not work depending on the specification of the external device.)

Registering the remote control code for a TV

You can use the unit’s remote control to operate a TV if you have registered its remote control code.

- You can also register your TV’s remote control code to the unit’s input selection keys (p.86). This would allow you to use the cursor keys or numeric keys to operate the TV (this function may not be available on some TV models).

1. Use “Remote Control Code Search” in the CD-ROM to find your TV’s remote control code.

- If there are multiple remote control codes, register the first code in the list. If that does not work, try the other codes.

2. Press CODE SET using a pointed object such as the tip of a ballpoint pen.

   SOURCE/RECEIVER blinks twice.

   Perform each of the following steps within 1 minute. Otherwise, the setting will be canceled. If this happens, repeat from Step 2.

   - Press TV ⊗.

   - Use the numeric keys to enter the 4-digit remote control code.

     Once the remote control code is successfully registered, SOURCE/RECEIVER blinks twice. If it blinks six times, registration has failed. Repeat from Step 2.

TV operations

Once you have registered the remote control code for your TV, you can control it using the TV operation keys, regardless of the input source selected on the unit.

<table>
<thead>
<tr>
<th>TV operation keys</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>INPUT</td>
<td>Switches the video inputs of the TV.</td>
</tr>
<tr>
<td>MUTE</td>
<td>Mutes the audio output of the TV.</td>
</tr>
<tr>
<td>TV VOL</td>
<td>Adjust the volume of the TV.</td>
</tr>
<tr>
<td>TV CH</td>
<td>Switch the channels of the TV.</td>
</tr>
<tr>
<td>TV ⊗</td>
<td>Turns on/off the TV.</td>
</tr>
</tbody>
</table>
Registering the remote control codes for playback devices

You can use the unit’s remote control to operate playback devices if you have registered their remote control codes. You can also use the input selection keys to change the playback devices that are controlled by the remote control, because their remote control codes are assigned to the input selection keys.

1. Use “Remote Control Code Search” in the CD-ROM to find the remote control code for your playback device.
2. Press CODE SET using a pointed object such as the tip of a ballpoint pen.
3. Press the input selection key.
4. Use the numeric keys to enter the 4-digit remote control code.

Once you have registered the remote control code for your playback device, you can control it using the following keys after selecting the input source or scene.

- By pressing SOURCE/RECEIVER, you can switch the devices (the unit or external device) that are operated by the menu operation keys, DISPLAY and numeric keys. You can operate the unit when SOURCE/RECEIVER lights up in orange, and an external device when SOURCE/RECEIVER lights up in green.

   SOURCE
   Turns on/off the playback device.

   Cursor keys
   Select an item.

   ENTER
   Confirms a selected item.

   RETURN
   Returns to the previous screen.

   DISPLAY
   Switches information on the display.

   TOP MENU
   Displays the top menu.

   POP-UP MENU
   Displays the pop-up menu.

   Stop playback.

   Stops playback temporarily.

   Starts playback of the selected song/video.

   Searches forward/backward (by holding down).

   Skips forward/backward.

   Enter numerical values.

   Control the TV (p.85).

- These keys work only if the corresponding function is available on your playback device and if the device can be operated with an infrared remote control.
Resetting remote control codes

You can reset a remote control code registered to each input selection key.

1. Press CODE SET using a pointed object such as the tip of a ballpoint pen.
   SOURCE/RECEIVER blinks twice.
   Perform each of the following steps within 1 minute. Otherwise, the setting will be canceled. If this happens, repeat from Step 1.

2. Press the input selection key.

3. Use the numeric keys to enter “5098”.
   Once the remote control code is reset successfully, SOURCE/RECEIVER blinks twice. If it blinks six times, resetting has failed. Repeat from Step 1.

To reset the remote control to factory default settings

1. Press CODE SET using a pointed object such as the tip of a ballpoint pen.
2. Press SOURCE/RECEIVER.
3. Use the numeric keys to enter “9981”.
Updating the unit’s firmware via the network

New firmware that provides additional features or product improvements will be released as needed. If the unit is connected to the Internet, you can download the firmware via the network and update it.

**Note**
- Do not operate the unit or disconnect the power cable or network cable during firmware update. Firmware update takes about 20 minutes or more (depending on your Internet connection speed).
- If the unit is connected to the wireless network via a wireless network adapter, network update may not be possible depending on the condition of the wireless connection. In this case, update the firmware using the USB memory device (p.84).
- To perform the following procedure, your TV must be connected to the unit via HDMI. If not, perform the update from the “ADVANCED SETUP” menu (p.84).

1. Press SETUP.
2. Use the cursor keys to select “Network” and press ENTER.
3. Use the cursor keys to select “Network Update” and press ENTER.
   If new firmware is available, the envelope icon (✉) appears in the “Network Update” screen.

4. Use the cursor keys to select “Perform Update” and press ENTER.
   The on-screen display turns off and the firmware update starts.
5. If “UPDATE SUCCESS PLEASE POWER OFF!” appears on the front display, press (power) on the front panel.
   The firmware update is complete.

* To cancel the operation without updating the firmware, press SETUP.

* You can also update the firmware using the USB memory device from the “ADVANCED SETUP” menu (p.84).
The new speaker system does not provide an ideal sound balance...

If you have changed speakers or have a new speaker system, use YPAO to optimize the speaker settings again (p.31). If you want to adjust the speaker settings manually, use “Speaker” in the “Setup” menu (p.71).

Since we have small children, we want to set limitations on the volume control...

If a small child accidentally operates the controls on the main unit or remote control, the volume may suddenly increase. This may also cause injury or damage the unit or speakers. We recommend using “Max Volume” in the “Setup” menu to set the maximum volume level for the unit in advance (p.77).

I am occasionally startled by a sudden loud sound when turning on the unit...

By default, the volume level when the unit last entered standby mode is automatically applied. If you want to fix the volume, use “Initial Volume” in the “Setup” menu to set the volume to be applied when the receiver is turned on (p.77).

We are bothered by volume differences when switching between input sources...

You can correct volume differences between input sources by utilizing “Input Trim” in the “Option” menu (p.66).

I made HDMI connections but HDMI Control does not work at all...

To use HDMI Control, you need to perform the HDMI Control link setup (p.100). After connecting HDMI Control-compatible devices (such as BD/DVD players) to the unit, enable HDMI Control on each device and perform the HDMI Control link setup. This setup is required every time you add a new HDMI Control-compatible device to your system. For information on how HDMI Control works between your TV and playback devices, refer to the instruction manuals for each device.

I want to display a device name or a manufacture name on the front display when selecting an input source...

By default, input source names (such as “HDMI 1” and “AV 1”) are displayed on the front display when an input source is selected. If you want to rename them as you like, use “Input Rename” (p.78) in the “Setup” menu. You can also select a name from the presets (such as “Blu-ray” and “DVD”).

I want to prevent accidental changes to the settings...

You can protect the settings configured on the unit (such as speaker settings) by utilizing “Memory Guard” in the “Setup” menu (p.79).

The unit’s remote control is simultaneously controlling another Yamaha product as well as the unit...

When using multiple Yamaha products, the remote control may work on another Yamaha product or another remote control may work on the unit. If this happens, register different remote control IDs for the devices that you want to control with each remote control (p.83).

I want to enjoy videos/audio played back on the video device even when the unit is in standby mode...

If you have connected a video device to the unit with HDMI, you can output videos/audio played back on the video device to the TV even when the unit is in standby mode. To use this function, set “Standby Through” (p.74) in the “Setup” menu to “On”. You can also switch the input source using the remote control of the unit when this function is enabled.
Troubleshooting

Refer to the table below when the unit does not function properly.
If the problem you are experiencing is not listed below or if the instructions below do not help, turn off the unit, disconnect the power cable, and contact the nearest authorized Yamaha dealer or service center.

First, check the following:
① The power cables of the unit, TV and playback devices (such as BD/DVD players) are connected to AC wall outlets securely.
② The unit, subwoofer, TV and playback devices (such as BD/DVD players) are turned on.
③ The connectors of each cable are securely inserted in to jacks on each device.

Power, system and remote control

</table>
Audio information

Audio decoding format

Dolby Digital
Dolby Digital is a compressed digital audio format developed by Dolby Laboratories, Inc. that supports 5.1-channel audio. This technology is used for audio on most DVD discs.

Dolby Digital EX
Dolby Digital EX creates total 6.1-channel audio from 5.1-channel sources that are recorded with Dolby Digital Surround EX. This decoder adds a surround back sound to the original 5.1-channel sound.

Dolby Digital Plus
Dolby Digital Plus is a compressed digital audio format developed by Dolby Laboratories, Inc. that supports 7.1-channel audio. Dolby Digital Plus remains fully compatible with the existing multichannel audio systems that support Dolby Digital. This technology is used for audio on BD (Blu-ray discs).

Dolby Pro Logic II
Dolby Pro Logic II enables 5-channel playback from 2-channel sources. There are three modes available: “Music mode” for music sources, “Movie mode” for movie sources, and “Game mode” for game sources.

Dolby Pro Logic Ilx
Dolby Pro Logic Ilx enables 7-channel playback from 2-channel or multichannel sources. There are three modes available: “Music mode” for music sources, “Movie mode” for movie sources and “Game mode” for game sources (for 2-channel sources only).

Dolby TrueHD
Dolby TrueHD is an advanced lossless audio format developed by Dolby Laboratories, Inc. to offer a high-definition home theater experience with the quality of the studio master. Dolby TrueHD can carry up to eight channels of 96 kHz/24-bit audio (up to six channels of 192 kHz/24-bit audio) simultaneously. This technology is used for audio on BD (Blu-ray discs).

DTS 96/24
DTS 96/24 is a compressed digital audio format that supports 5.1-channel and 96 kHz/24-bit audio. This format remains fully compatible with the existing multichannel audio systems that support DTS Digital Surround. This technology is used for music DVDs, etc.

DTS Digital Surround
DTS Digital Surround is a compressed digital audio format developed by DTS, Inc. that supports 5.1-channel audio. This technology is used for audio on most DVD discs.

DTS-ES
DTS-ES creates total 6.1-channel audio from 5.1-channel sources that are recorded with DTS-ES. This decoder adds a surround back sound to the original 5.1-channel sound. In the DTS-ES Matrix 6.1 format, a surround back sound is recorded in the surround channels, and in the DTS-ES Discrete 6.1 format, a discrete surround back channel is recorded.

DTS Express
DTS Express is a compressed digital audio format that supports 5.1-channel audio and allows a higher compression rate than the DTS Digital Surround format developed by DTS, Inc. This technology is developed for audio streaming services on the Internet and secondary audio on BD (Blu-ray discs).

DTS-HD High Resolution Audio
DTS-HD High Resolution Audio is a compressed digital audio format developed by DTS, Inc. that supports 7.1-channel and 96 kHz/24-bit audio. DTS-HD High Resolution Audio remains fully compatible with the existing multichannel audio systems that support DTS Digital Surround. This technology is used for audio on BD (Blu-ray discs).

DTS-HD Master Audio
DTS-HD Master Audio is an advanced lossless audio format developed to offer a high-definition home theater experience with the quality of the studio master by DTS, Inc. DTS-HD Master Audio can carry up to eight channels of 96 kHz/24-bit audio (up to six channels of 192 kHz/24-bit audio) simultaneously. This technology is used for audio on BD (Blu-ray discs).

DTS Neo:6
DTS Neo:6 enables 6-channel playback from 2-channel sources. There are two modes available: “Music mode” for music sources and “Cinema mode” for movie sources. This technology provides discrete full-bandwidth matrix channels of surround sound.

DSD (Direct Stream Digital)
DSD (Direct Stream Digital) technology stores audio signals on digital storage media, such as SACD (Super Audio CDs). The signals are stored at a high-frequency sampling rate of 2.8224 MHz. The highest frequency response is equal to or higher than 100 kHz, with a dynamic range of 120 dB. This technology offers better audio quality than that used for CDs.

FLAC
FLAC is a file format for lossless audio data compression. FLAC is inferior to lossy compressed audio formats in compression rate but provides higher audio quality.

MP3
One of the compressed digital audio format used by MPEG. With psychoacoustic technologies, this compression method achieves a high compression rate. Reportedly, it is capable of compressing data quantity by about 1/10 maintaining a certain level of audio quality.

MPEG-4 AAC
An MPEG-4 audio standard. It is used for mobile telephones, portable audio players, and audio streaming services on Internet because it allows a high compression rate of data while maintaining better audio quality than MP3.

PCM (Pulse Code Modulation)
PCM is a signal format under which an analog audio signal is digitized, recorded, and transmitted. This technology is the basis of all other audio format. This technology is used as a lossless audio format called Linear PCM for audio on a variety of media, including CDs and BD (Blu-ray discs).
Sampling frequency/Quantization bit
Sampling frequency and quantization bits indicate the quantity of information when an analog audio signal is digitized. These values are noted as in the following example: “48 kHz/24-bit”.
- **Sampling frequency**
  Sampling frequency (the number of times the signal is sampled per second) is called the sampling rate. When the sampling frequency is higher, the range of frequencies that can be played back are wider.
- **Quantization bit**
  The number of quantization bits indicate the degree of accuracy when converting the sound level into a numeric value. When the number of quantized bits is higher, the expression of the sound level is more accurate.

WAV
Windows standard audio file format, which defines the method of recording the digital data obtained by converting audio signals. By default, the PCM method (no compression) is used, but you can also use other compression methods.

WMA (Windows Media Audio)
One of the compressed digital audio formats developed by Microsoft Corporation. With psychoacoustic technologies, this compression method achieves a high compression rate. Reportedly, it is capable of compressing data quantity by about 1/20 maintaining a certain level of audio quality.

**Others**

Bi-amp
A bi-amp uses two amplifiers for a speaker. When you use the bi-amp, the tweeter and woofer provide clear audio signal without the interference.

LFE (Low Frequency Effects) 0.1 channel
This channel reproduces low-frequency bass signals and has a frequency range from 20 Hz to 120 Hz. This channel is added to the channels for all bands with Dolby Digital or DTS to enhance low frequency audio effects. This channel is labeled 0.1 because it is limited to only low frequency audio.

Lip sync
Video output sometimes lags behind audio output due to the complexity of signal processing caused by an increase in video signal capacity. Lip sync is a technique for automatically correcting the timing lag between audio and video output.

---

**HDMI and video information**

**Component video signal**
With the component video signal system, the video signal is separated into the Y signal for luminance and the Pb and Pr signals for chrominance. Color can be reproduced more faithfully with this system because each of these signals is independent.

**Composite video signal**
With the composite video signal system, color, brightness, and synchronization data signals are combined and transmitted with a single cable.

**Deep Color**
Deep Color is a technology that HDMI specification supports. Deep Color increases the number of available colors within the boundaries defined by the RGB or YCbCr color space. Conventional color systems process the color using 8 bits. Deep Color processes the color with 10, 12, or 16 bits. This technology allows HDTVs and other displays to increase from millions of colors to billions of colors and eliminate on-screen color banding for smooth tonal transitions and subtle gradations between colors.

HDMI
HDMI (High-Definition Multimedia Interface) is the world-wide standard interface for digital audio/video signal transmission. This interface transmits both digital audio and digital video signals using a single cable without any loss. HDMI complies with HDCP (High-bandwidth Digital Content Protection) and provides a secure audio/video interface. For further information on HDMI, visit the HDMI website at “http://www.hdmi.org/”.

MHL
MHL (Mobile High-definition Link) is the interface standard for high-speed digital video signal transmission that is developed for mobile devices. This interface transmits both digital audio and digital video signals from mobile devices (such as smartphones) using a single cable with any loss. As with HDMI, MHL complies with HDCP (High-bandwidth Digital Content Protection).

x.v.Color
“x.v.Color” is a technology that the HDMI specification supports. It is a more extensive color space than sRGB and allows the expression of colors that were not hitherto possible. While remaining compatible with the color gamut of sRGB standards, “x.v.Color” expands the color space, and thus can produce more vivid, natural images.
Yamaha technologies

CINEMA DSP (Digital Sound Field Processor)
Since the Dolby Surround and DTS systems were originally designed for use in movie theaters, their effect is best experienced in a theater that has many speakers designed for acoustic effects. Since home conditions (such as room size, wall material, and number of speakers) can differ so widely, it is inevitable that there are differences in the sound that you hear. Based on a wealth of actually measured data, CINEMA DSP, Yamaha’s original DSP technology provides the audiovisual experience of a movie theater in your own home.

CINEMA DSP 3D
The actually measured sound field data contain the information of the height of the sound images. CINEMA DSP 3D mode achieves the reproduction of the accurate height of the sound images so that it creates the accurate and intensive 3D sound fields in a listening room.

Compressed Music Enhancer
The Compressed Music Enhancer feature compensates for missing harmonics in compression music formats (such as MP3). As a result, this technology provides improved performance for the overall sound system.

SILENT CINEMA
Yamaha has developed a natural, realistic sound effect DSP algorithm for headphones. Parameters for headphones have been set for each sound program, so that accurate representations of all the sound programs can be enjoyed on headphones.

Virtual CINEMA DSP
Virtual CINEMA DSP allows the system to virtually reproduce the sound field of the surround speakers with front left and right speakers. Even if the surround speakers are not connected, the unit creates the realistic sound field in a listening room.

Virtual Presence Speaker (VPS)
Virtual Presence Speaker allows the system to virtually reproduce the height of the 3D sound field without front presence speakers. Even if the front presence speakers are not connected, the unit creates the 3D sound field in your room.
Video signal flow

Video signals input from a video device to the unit are output to a TV as shown below.

Information on HDMI

HDMI Control

HDMI Control allows you to operate external devices via HDMI. If you connect a TV that supports HDMI Control to the unit with an HDMI cable, you can control the unit (such as power and volume) with TV remote control operations. You can also control playback devices (such as HDMI Control-compatible BD/DVD players) connected to the unit with an HDMI cable.

For details on connections, see “Connecting a TV” (p.18) and “Connecting video devices (such as BD/DVD players)” (p.23).

Operations available from the TV's remote control

- Standby synchronization
- Volume control including mute
- Switching to input audio from the TV when the TV input is switched to its built-in tuner
- Switching to input video/audio from the selected playback device
- Switching between audio output devices (the unit or TV speaker)

(Example)

Operations available from the unit’s remote control

- Starting playback on the playback device and turning on the TV with a scene selection (p.36)
- Switching the TV input to display the “Setup” menu (when SETUP is pressed)
- Controlling the playback device (playback and menu operations) without registering remote control codes (p.86)
(Example)

To use HDMI Control, you need to perform the following HDMI Control link setup after connecting the TV and playback devices.

⚠️ This setup is required every time you add a new HDMI Control-compatible device to your system.

1. **Turn on the unit, TV, and playback devices.**

2. **Enable HDMI Control on the unit, TV, and playback devices (such as HDMI Control-compatible BD/DVD players).**
   
   To enable HDMI Control on the unit, set “HDMI Control” (p.74) in the “Setup” menu to “On” and configure the related items (“TV Audio Input”, “Standby Sync”, “ARC”, and “SCENE”).

3. **Turn off the main power of the TV and then turn off the unit and playback devices.**

4. **Turn on the unit and playback devices and then turn on the TV.**

5. **Switch the TV input to display the video from the unit.**

6. **Check the followings.**
   
   On the unit: The input to which the playback device is connected is selected. If not, select the input source manually.
   
   On the TV: The video from the playback device is displayed.

7. **Check that the unit is properly synchronized with the TV by turning off the TV or adjusting the TV volume with the TV remote control.**

⚠️ If HDMI Control does not work properly, try unplugging the TV in Step 2 and plugging in the TV again in Step 3. It may solve the problem. Also, HDMI Control may not work if the number of connected devices exceeds the limit. In this case, disable HDMI Control on the devices not in use.

⚠️ If the unit is not synchronized to the TV’s power operations, check the priority of the audio output setting on the TV.

⚠️ We recommend using TV and playback devices from the same manufacturer so that HDMI Control works more effectively.

## Video signals

The unit is compatible with the video signals of the following resolutions:

- VGA
- 480i/60 Hz
- 576i/50 Hz
- 480p/60 Hz
- 576p/50 Hz
- 720p/60 Hz, 50 Hz
- 1080i/60 Hz, 50 Hz
- 1080p/60 Hz, 50 Hz, 30 Hz, 25 Hz, 24 Hz
- 4K/30 Hz, 25 Hz, 24 Hz

- When CPPM copy-protected DVD-Audio is played back, video/audio signals may not be output, depending on the type of the DVD player.
- The unit is not compatible with HDCP-incompatible HDMI or DVI devices. For details, refer to the instruction manual for each device.
- To decode audio bitstream signals on the unit, set the input source device appropriately so that the device outputs the bitstream audio signals directly (does not decode the bitstream signals on the playback device). For details, refer to the instruction manual for the playback device.
The area around the video/audio output jacks is marked in white on the actual product to prevent improper connections.

Specifications

**Input jacks**
- Analog Audio
  - Audio x 4 (AV 5–6, AUDIO, V-AUX [Mini Jack])
- Digital Audio (Supported frequencies: 32 kHz to 96 kHz)
  - Optical x 2 (AV 1, AV 4)
  - Coaxial x 2 (AV 2–3)
- Video
  - Composite x 5 (AV 3–6, V-AUX)
  - Component x 2 (AV 1–2)
- HDMI Input
  - HDMI x 5 (HDMI 1–5*)
  - * HDMI 5: MHL input compatible
- Other jacks
  - USB x 1 (USB2.0)
  - NETWORK x 1 (100Base-TX/10Base-T)

**Output jacks**
- Analog Audio
  - Speaker Out x 7 (FRONT L/R, CENTER, SURROUND L/R, SURROUND BACK L/R*)
  - * Note: assignment is possible. [SURROUND BACK, BI-AMP (FRONT L/R), ZONE B]
  - Subwoofer Out x 2 (SUBWOOFER 1–2, mono)
  - AV OUT x 1
  - Headphone x 1
- HDMI Output
  - HDMI OUT x 1
- YPAO MIC x 1
- DC OUT x 1

**Video**
- MONITOR OUT
  - Component x 1
  - Composite x 1
- AV OUT
  - Composite x 1
- HDMI Output
  - HDMI OUT x 1

**Other jacks**
- YPAO MIC x 1
- DC OUT x 1

**HDMI**
- Video Format (Repeater Mode)
  - VGA
  - 480i/60 Hz
  - 480p/60 Hz
  - 576p/50 Hz
  - 720p/60 Hz
  - 1080i/60 Hz
  - 1080p/30 Hz
  - 4K/30 Hz

- Audio Format
  - Dolby TrueHD
  - Dolby Digital Plus
  - Dolby Digital
  - DTS-HD Master Audio
  - DTS-HD High Resolution Audio
  - DTS Express
  - DTS
  - DSD 6-ch
  - PCM 2-ch to 8-ch (Max. 192 kHz/24-bit)

- Content Protection: HDCP compatible
- Link Function: CEC supported

**MHL**
- Video Format (Repeater Mode)
  - VGA
  - 480i/60 Hz
  - 576i/50 Hz
  - 480p/60 Hz
  - 576p/50 Hz
  - 720p/60 Hz
  - 1080i/60 Hz
  - 1080p/30 Hz
  - 2700p/60 Hz

- Audio Format
  - PCM 2-ch to 8-ch (Max. 192 kHz/24-bit)
  - Current Supply Capacity: 1.0 A

**TUNER**
- Analog Tuner
  - [U.K. and Europe models]
  - FM/AM with Radio Data System x 1 (TUNER)
  - [Other models]
  - FM/AM x 1 (TUNER)

**USB**
- Capable of iPod, Mass Storage Class USB Memory
- Current Supply Capacity: 2.1 A

**Network**
- PC Client Function
- Compatible with DLNA ver. 1.5
- AirPlay supported
- Internet Radio
**Compatible Decoding Formats**

- **Decoding Format**
  - Dolby TrueHD, Dolby Digital Plus
  - Dolby Digital EX
  - Dolby Digital
  - DTS-HD Master Audio, DTS-HD High Resolution Audio, DTS Express
  - DTS, DTS 96/24, DTS-ES Matrix 6.1, DTS-ES Discrete 6.1
  - DTS Digital Surround

- **Post Decoding Format**
  - [RX-V575]
    - Dolby Pro Logic
    - Dolby Pro Logic II Music, Dolby Pro Logic II Movie, Dolby Pro Logic II Game
    - DTS Neo:6 Music, DTS Neo:6 Cinema
  - [RX-V475]
    - Dolby Pro Logic
    - Dolby Pro Logic II Music, Dolby Pro Logic II Movie, Dolby Pro Logic II Game
    - DTS Neo:6 Music, DTS Neo:6 Cinema

**Audio Section**

- **Rated Output Power (2-channel driven)**

    - Surround Back L/R [RX-V575] ...................... 95 W+95 W

- **Rated Output Power (1-channel driven)**
  - [U.S.A. and Canada models] (1 kHz, 0.9% THD, 8 Ω)
  - [Other models] (1 kHz, 0.9% THD, 6 Ω)
    - Front L/R .................................................. 115 W/ch
    - Center .......................................................... 115 W/ch
    - Surround L/R .............................................. 115 W/ch
    - Surround Back L/R [RX-V575] ...................... 115 W/ch

- **Maximum Effective Output Power (JEITA, 1 kHz, 10% THD, 6 Ω)**
  - [China, Korea, Asia and General models]
    - Front L/R .................................................. 135 W/ch
    - Center .......................................................... 135 W/ch
    - Surround L/R .............................................. 135 W/ch
    - Surround Back L/R [RX-V575] ...................... 135 W/ch

- **Dynamic Power (IHF)**
  - [U.S.A. and Canada models]
    - RX-V475: Front L/R (8/6/4/2 Ω) ............... 110/130/160/180 W
    - RX-V575: Front L/R (8/6/4/2 Ω) ............... 120/140/170/190 W
  - [Other models]
    - RX-V575: Front L/R (6/4/2 Ω) .................. 120/140/170 W

- **Dynamic Headroom [U.S.A. and Canada models]**
  - 8 Ω .............................................................. 0.2 dB
  - Damping Factor
    - Front L/R, 20 Hz to 20 kHz, 8 Ω ...................... 120 or more

- **Input Sensitivity / Input Impedance**
  - AV 5 etc. (1 kHz, 100 W/8 Ω) ...................... 200 mV/47 kΩ
  - Maximum Input Signal
    - AV 5 etc. (1 kHz, 0.5% THD, Effect On) .......... 2.3 V

- **Output Level / Output Impedance**
  - AV OUT ...................................................... 200 mV/1.2 kΩ
  - SUBWOOFER .................................................. 1 V/1.2 kΩ

- **Headphone Jack Rated Output / Impedance**
  - AV 5 etc. (1 kHz, 50 mV, 8 Ω) ...................... 100 mV/470 kΩ

- **Frequency Response**
  - AV 5 etc. to Front (10 Hz to 100 kHz) .............. +0/-3 dB

- **Signal to Noise Ratio (IHF-A Network)**
  - AV 5 etc. (Input Shorted 250 mV, Speaker Out)
  - .............................................................. 100 dB or more

- **Residual Noise (IHF-A Network)**
  - Front L/R (Speaker Out) ....................... 150 µV or less

- **Channel Separation**
  - AV 5 etc. (Input 5.1 kΩ Shorted, 1 kHz/10 kHz) ...
  - .............................................................. 60 dB/45 dB or more

- **Volume Control**
  - Range ................................................ MUTE, -80 dB to +16.5 dB

- **Tone Control Characteristics**
  - Bass Boost/Cut ......................................... ±6 dB/0.5 dB Step at 50 Hz
  - Bass Turnover ........................................... 350 Hz
  - Treble Boost/Cut ......................................... ±6 dB/0.5 dB Step at 20 kHz
  - Treble Turnover ......................................... 3.5 kHz

- **Filter Characteristics**
  - (fc=40/60/80/90/100/110/120/160/200 Hz)
    - H.P.F. (Front, Center, Surround) ................. 12 dB/oct.
    - H.P.F. (Surround Back [RX-V575]) ................. 12 dB/oct.
    - L.P.F. (Subwoofer) ........................................ 24 dB/oct.
Video Section

- Video Signal Type
  [U.S.A., Canada, Korea and General models] ............... NTSC
  [Other models] ......................................................... PAL

- Video Signal Level
  Component ............................................................. 1 Vp-p/75 Ω
  Y ......................................................................... 1 Vp-p/75 Ω
  Pb/Pr ................................................................. 0.7 Vp-p/75 Ω

- Video Maximum Input Level ................................... 1.5 Vp-p or more

- Video Signal to Noise Ratio ................................... 50 dB or more

- Monitor Out Frequency Response
  Component ......................................................... 5 Hz to 60 MHz, -3 dB

FM Section

- Tuning Range
  [U.S.A. and Canada models] ......................... 87.5 to 107.9 MHz
  [Asia and General models] ................................. 87.5/87.50 MHz to 108.0/108.00 MHz
  [Other models] ......................................................... 87.50 MHz to 108.00 MHz

- 50 dB Quiet Sensitivity (IHF, 1 kHz, 100% MOD.)
  Mono .................................................................. 3 µV (20.8 dBf)

- Signal to Noise Ratio (IHF)
  Mono .................................................................. 71 dB
  Stereo ............................................................... 68 dB

- Harmonic Distortion (IHF, 1 kHz)
  Mono ................................................................. 0.3%
  Stereo ............................................................... 0.5%

- Antenna Input ..................................................... 75 Ω unbalanced

AM Section

- Tuning Range
  [U.S.A. and Canada models] ................................. 530 to 1710 kHz
  [Asia and General models] ................................. 530/531 kHz to 1710/1611 kHz
  [Other models] ......................................................... 531 kHz to 1611 kHz

General

- Power Supply
  [U.S.A. and Canada models] ......................... AC 120 V, 60 Hz
  [General model] .............................................. AC 110 to 120/220 to 240 V, 50/60 Hz
  [China model] ................................................... AC 220 V, 50 Hz
  [Korea model] .................................................... AC 220 V, 60 Hz
  [Australia model] .............................................. AC 240 V, 50 Hz
  [U.K. and Europe models] ............................... AC 230 V, 50 Hz
  [Asia model] ..................................................... AC 220 to 240 V, 50/60 Hz

- Power Consumption
  [U.S.A. and Canada models] ............................ 270 W/320 VA
  [Other models] ..................................................... 280 W

- Standby Power Consumption
  HDMI Control Off, Standby Through Off ........... 0.1 W or less
  HDMI Control On, Standby Through On (No Signals)
  ................................................................. 1.0 W (Typical)
  Network Standby On ......................................... 2.0 W (Typical)

- Dimensions (W x H x D)
  .................................................. 435 x 161 x 315 mm (17-1/8” x 6-3/8” x 12-3/8”)
  * Including legs and protrusions

- Weight
  [RX-V575] ......................................................... 8.2 kg (18.1 lbs)
  [RX-V475] ......................................................... 8.1 kg (17.9 lbs)

* Specifications are subject to change without notice.
